The "19-inch-Assembly System"

The so-called 19-inch assembly system consists of a wide range of mechanical and electromechanical components matched to each other in terms of their dimensions and can be regarded as a „mechanical construction kit“ for assembling electronic devices and systems.

The "19-inch assembly system" was first presented in 1970 at the Hanover Trade Fair by AEG Telefunken (Intermas Modular Assembly Systems). The first application areas of this revolutionary development were industrial electronics followed by power station control engineering and traffic engineering. Today the system is in use worldwide in almost all areas of industrial electronics such as telecommunications, military technology, medical technology, measurement and control technology etc.

The 19 inches originated in the width of equipment front panels in accordance with the USA standard C83-9. In view of the frequent need to combine European and American equipment in a single system the width and

the height increments of the 19-inch front panel became the starting point for the DIN 41494 and IEC 60 297-1 standards. Although the 19-inch (482.6 mm) dimension is only used once as the width specification for the front panels of plug-in units and subracks, it has given its name to the modular assembly system. All system dimensions are defined in mm. The correct designation should therefore more correctly be 482.6 mm technology, a term which is also used in DIN 14 494, the German standard for the 19" assembly system.

All necessary dimensions were defined in the German DIN 41 494 standard, in IEC Publication 60 297 and in the USA standard ANSI/IEEE 1101.

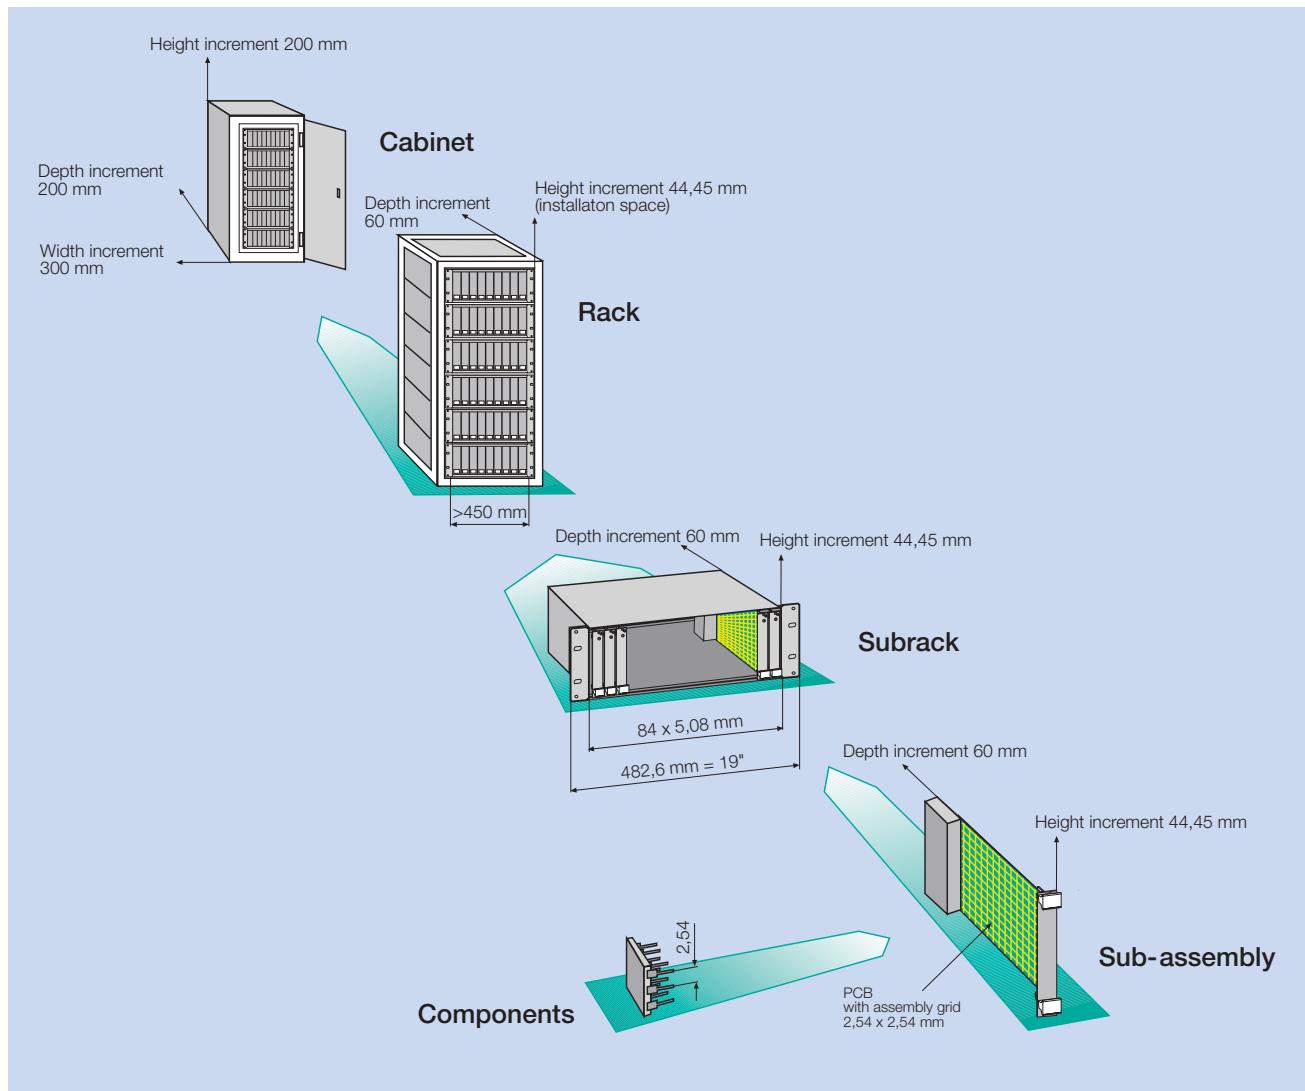

The aim of the standardization was to make it possible to combine different system components without problems and to ensure compatibility between different devices and modules as the basis for the specialization of individual manufacturers which resulted from global division of labor.

DIN standards and IEC publications

| System level | DIN-standards | IEC-publications | DIN-standards | IEC-publications | DIN-standards | IEC-publications |
|---|--|------------------|----------------------------|------------------|-----------------------------|------------------|
| Level 4 Racks | Table Top Housings DIN 41494 | IEC 60297-1/2 | Racks DIN 41494 | IEC 60297-1/2 | Cabinets DIN 41494 | IEC 60297-1/2 |
| Level 3 19"-Front- and rear pane and subracks | 19"-front panel DIN 41494 | IEC 60297-3 | 19"-subracks DIN 41494 | IEC 60297-3 | 19"-rear panel DIN 41494 | IEC 60297-3 |
| Level 2 Sub-assembly | PCB DIN 41494 | IEC 60297-3 | Plug in block DIN 41494 | IEC 60297-3 | Plug- in unit DIN 41494 | IEC 60297-3 |
| Level 1 Components | Sub-assemblies at front panel DIN 41494 | IEC 60297-3 | Cards DIN 41494 | IEC 60297-3 | Connectors DIN 41494 | IEC 60303-3 |

(cp.: "The Modular 19"-System", Hesse, 1991, side 43)

The "19-inch-Assembly System"

(Cp.: "The Modular 19"-System", Hesse, 1991, side 17)

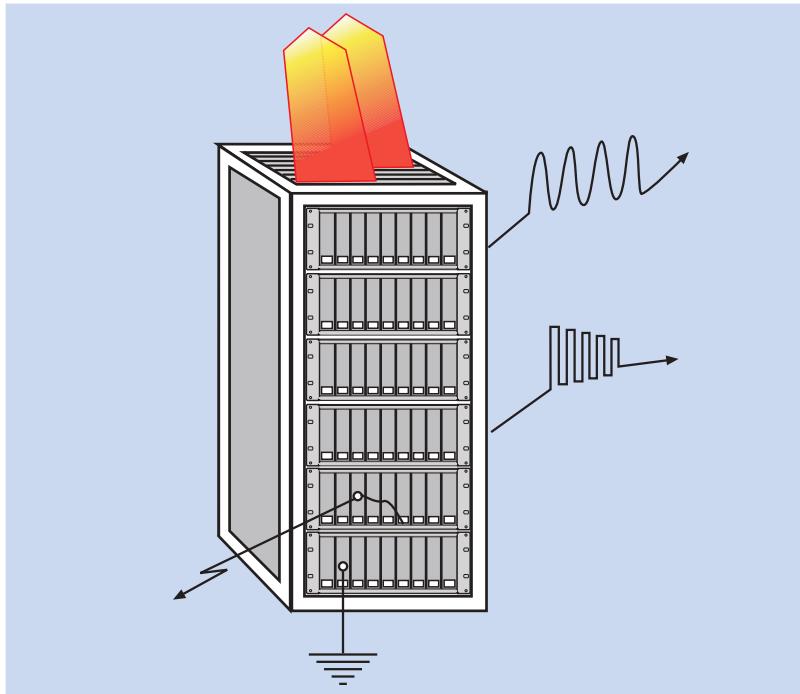

The modular structure

The modular structure of the so-called 19" assembly system allows components of one level to be freely combined with one another without problems and used in assemblies of the next higher level.

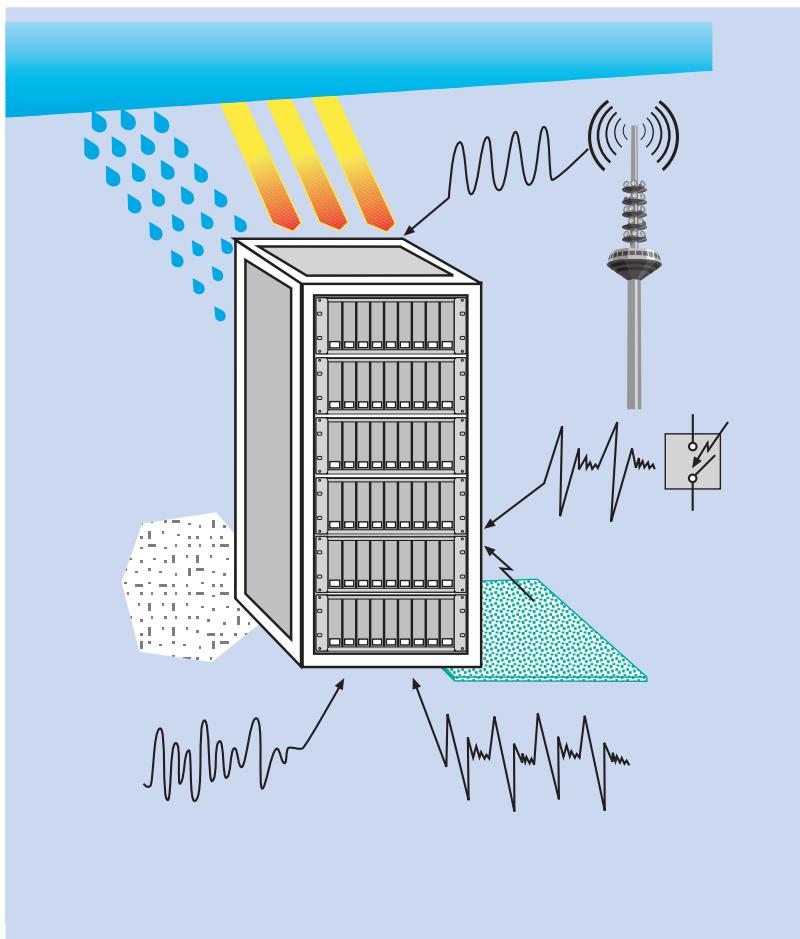

In addition to the 19" front panel, the dimensions of the Euroboard (100x160 mm), the component-fitting and wiring grid on the PCB (2,54 mm) and the external dimensions for cabinets formed the initial dimensions for the modular 19" assembly system.

Protection Requirements

The protection requirements depend on sensitivity of the installed electronics and on the interference levels at the installation location.

(Cp.: "The Modular 19"-System", Hesse, 1991, side 127)

(Cp.: "The Modular 19"-System", Hesse, 1991, side 127)

The protection requirements can be divided into:

1. Protection of the surrounding environment against interference, for example RF radiation, emitted by the device or protection against contact with live components.

2. Protection of the modules against external influences such as mechanical stresses as a result of vibration or shock, or infiltration of foreign bodies and humidity and also highfrequency interference signals.

EMI protection

Electromagnetic interference basically results from three different types of signals:

- ✓ sinusoidal permanent signals of fixed frequency
- ✓ broadband permanent signals (fundamental frequency with harmonics)
- ✓ transient signals (short period impulse)

In order to adequately counteract such interference factors the paneling elements are conductively connected to one another or bonded to one another using appropriate RFI gaskets.

IP-Protection Classes (IP-Code) IEC 60 529 / EN 60 529

| Protection for contact and foreign bodies | | Water protection | |
|--|--|--|--|
| IP 1. Index | | IP 2. Index | |
| 0 no special protection | | 0 no special protection | |
| 1 against large area bodies large foreign bodies $\varnothing > 50 \text{ mm (2")}$ | | 1 against water dripping vertically | |
| 2 against fingers medium sized foreign bodies $\varnothing > 12 \text{ mm (0.48")}$ | | 2 against water dripping at an angle up to 15° from the vertical | |
| 3 against tools, wires $> 2,5 \text{ mm (0.10")}$ small foreign bodies $\varnothing > 2,5 \text{ mm (0.10")}$ | | 3 against spray water any direction up to 60° from the vertical | |
| 4 against tools, wires $> 1 \text{ mm (0.04")}$ granular foreign bodies $\varnothing > 1 \text{ mm (0.04")}$ | | 4 against spray water | |
| 5 complete protection dust-protected against dust desposits | | 5 against water jets | |
| 6 complete protection dust-proof | | 6 against strong water jets | |
| | | 7 against immersion | |
| | | 8 against submersion | |

DIN EN ISO 9001:2015

Our ultimate goal is achieving a competitive advantage through competent advisory services combined with high quality and environmental awareness of our employees.

Quality policy

Quality and competitiveness of Intermas products and services are driven by customer requirements and expectations as well as international market standards. Therefore, every Intermas employee is dedicated to fulfill these requirements constantly and entirely.

Customer orientation and customer satisfaction

In order to improve the customer satisfaction consultation services are offered at any stage of the product life cycle. Our management informs customers about technical innovations.

Intermas offers expertise in developing technical solutions through a dialogue with customers. A certified quality management system according to DIN EN ISO 9001 is in place.

System Cabinet *InterRack*[®]

System Cabinet *InterRack*

A sophisticated, systematically constructed cabinet system for electrical engineering applications, e.g. as:

- ✓ a universal 19" cabinet
- ✓ a low-voltage cabinet
- ✓ a data and network cabinet

Also excellently suitable for your own designs or special solutions, e.g. as:

- ✓ a training cabinet
 - ✓ for patch panels
- or in
- ✓ maintenance and control engineering
 - ✓ military technology
 - ✓ traffic engineering

In short:

This cabinet meets all your requirements and desires.

System Cabinet *InterRack*[®]

Description

The InterRack system cabinet is made of steel and is easy to assemble using screws. Profiles and paneling elements are galvanized. The customer can choose between two colors of paint finish.

The rack variants and assembly elements provide the capacity for individual configuration.

Protection classes IP 40 and IP 54 are achieved thanks to the use of silicon-free seals.

The cabinet stands out due to its enormous flexibility of the configuration and extension options.

- ✓ Consistent assembly in the 25-mm-space grid enables appropriate graduation in terms of width, height and depth.
- ✓ Easily incorporated into CAE and CAD-supported development projects.
- ✓ Each level can be used for assembly using only a few system elements.
- ✓ Self-tapping screws allow simple and fast assembly and dismantling and ensure tight and electrically conductive connections.
- ✓ Conducting surfaces and the replaceable system elements ensure excellent EMC characteristics.

Delivery

As a completely assembled and painted cabinet. Unassembled components on request.

Technical Data

| | |
|----------------------|--|
| Standards | compliant with DIN 41 488, IEC 60 297-1 and 2, IEC 60917 |

Rack construction

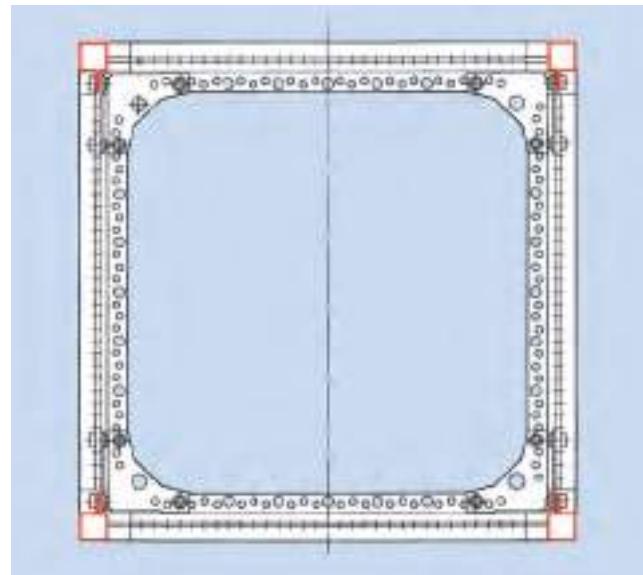

The rail profiles are rolled from galvanized sheet steel. This ensures optimal corrosion protection, including the cut edges. Two versions of rail profiles are available, rail profile W and rail profile V. Plug-in corner connectors made of die-cast aluminum ensure stable connection in all three axes. The rail profiles are then screwed to the gusset plate.

This method of construction allows assembly of any cabinet rack with an edge length of 250 to 2400 mm. Individual switch racks or patch panels can also be constructed just as easily.

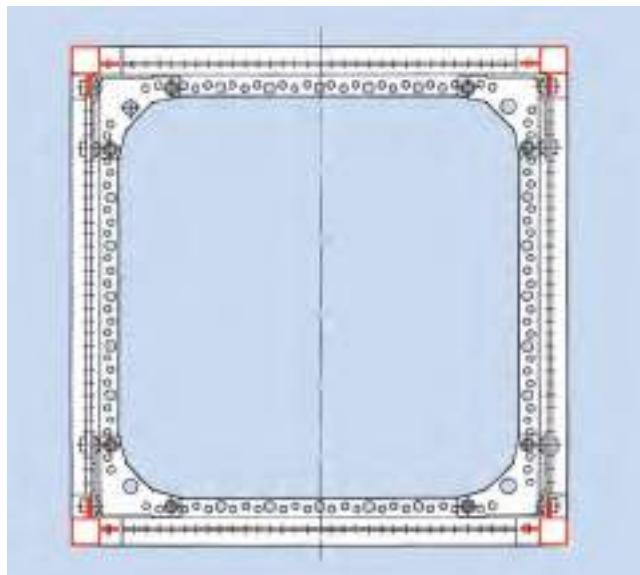

Rack version A

for stand alone cabinets with front door.

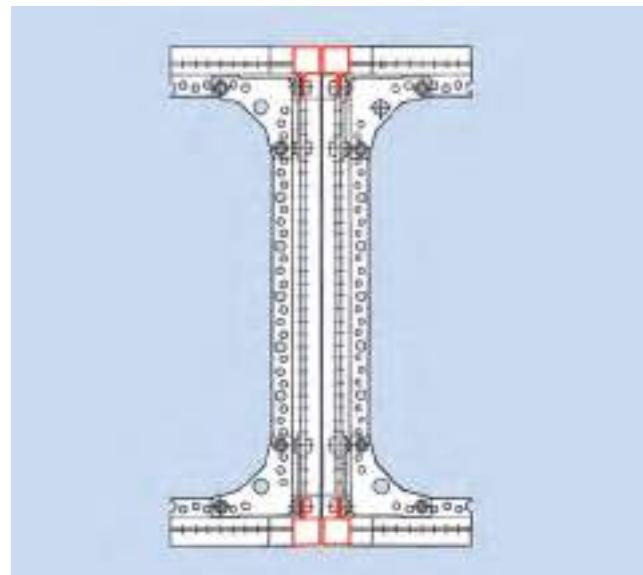

Rack version B

for stand alone cabinets with front and rear door.

Rack version C

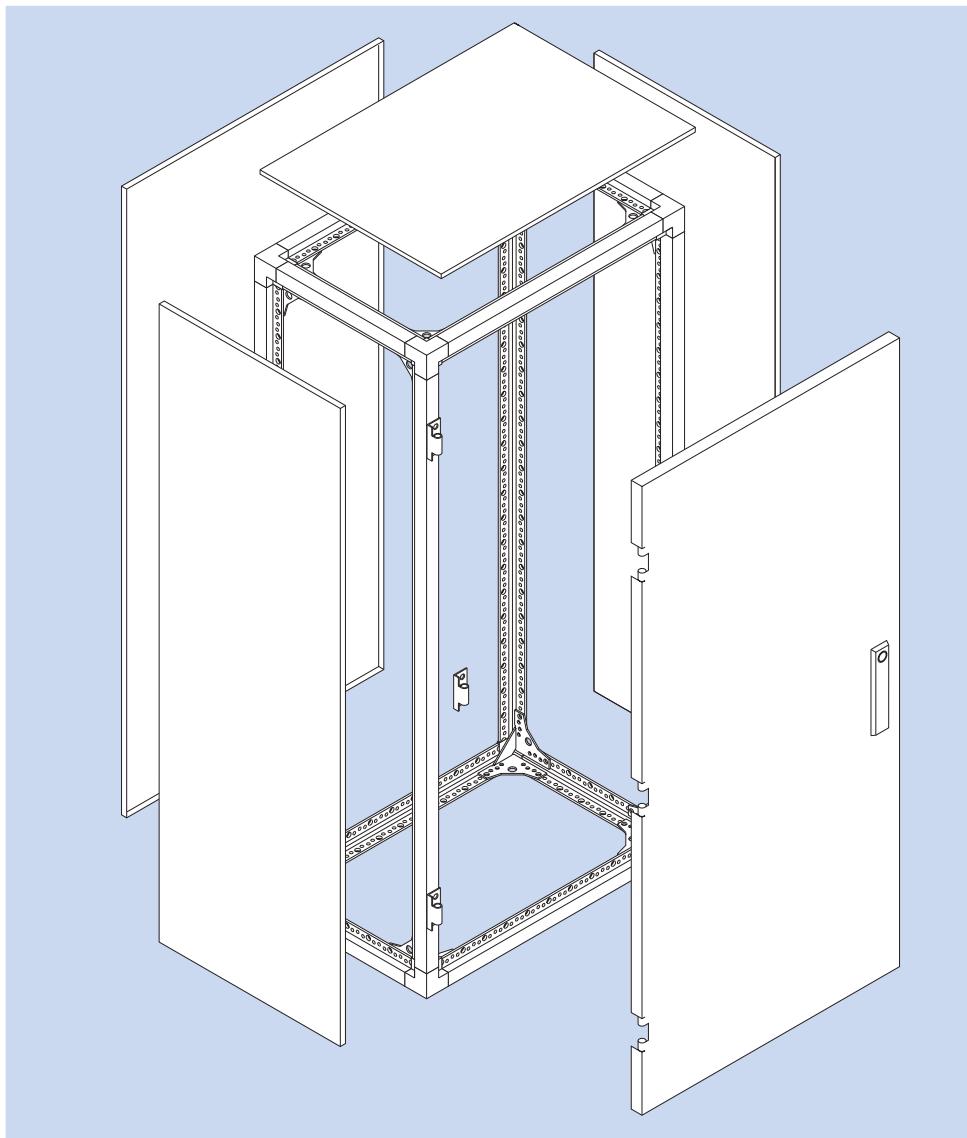

for protected and separated regions, all sides prepared for covering panels.

Rack version D

for frame type switchboards and distribution jumper rings.

Rail Profile V

For use as height profile and diving profile.

Length: 6360 mm

order no.: 409. 074 056

Rail Profile W

For use as height, depth, width profile and dividing profile

Length: 6360 mm

order no.: 409. 074 057

Corner Connector, Gusset Plate A and B, 19"-Unit Support

Corner Connector

For connecting the rear profiles.

Material: aluminum die casting

Finish: untreated

order no.: **409. 050 688**

Gusset Plate A

For fastening the rack corner.

Material: steel

Finish: galvanized, passivated

order no.: **409. 131 354**

Accessories

Cylinder head screw M 8 x 14

(Torx T40) DIN 7500

Minimum order quantity: 10 pieces

order no.: **409. 132 778**

Gusset Plate B

For fastening the rack corner.

To get maximum free space for assemblies and for fastening with screws M 8.

Material: steel

Finish: galvanized, passivated

order no.: **409. 167 416**

19"-Unit Support

Are mounted vertically, depth variable in 25-mm-space grid.

For mounting of 19"-equipment.

Material: steel

Finish: galvanized, passivated

Ordering details

| | for cabinet-height [mm] | length [mm] | order no. |
|-----------------------|----------------------------|----------------|----------------|
| 19"-unit support 2000 | 2000 | 1866.45 | 078 641 |
| 19"-unit support 2200 | 2200 | 2044.70 | 078 646 |

U-Strut, Universal Angle, Door Hinge 180°

Cabinets

U-Strut

As support for unit support and fixtures in 25-mm-space grid.

2 versions are available:

1. For mounting from outside the cabinet.
2. For mounting from inside the cabinet.

This version is especially suitable for later installations.

Material: steel, 3 mm thick

Finish: galvanized, passivated

Ordering details

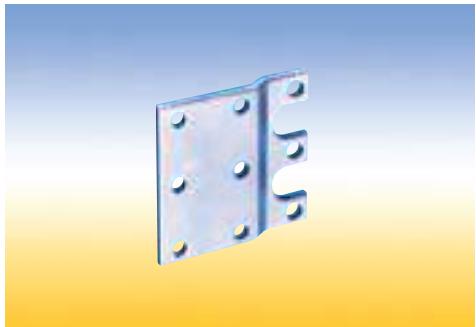

| | for cabinet-depth/width [mm] | outside order no. 409. | inside order no. 409. |
|-------------|---------------------------------|-------------------------------------|------------------------------------|
| U-Strut 400 | 400 | 049 677 | 132 601 |
| U-Strut 500 | 500 | 049 679 | 132 603 |
| U-Strut 600 | 600 | 049 680 | 132 604 |
| U-Strut 800 | 800 | 049 681 | 132 605 |
| U-Strut 900 | 900 | 049 682 | 132 606 |

Accessories

Hexagon Head Screw M 6 x 12

Minimum order quantity: 10 pieces

order no.: **409. 050 567**

Universal Angle

To fastening of 19"-unit support and accessories.

Material: steel, 3 mm thick

Finish: galvanized, passivated

order no.: **409. 132 240**

Accessory

Hexagon Head Screw M 6 x 12

Minimum order quantity: 10 Pieces

order no.: **409. 131 550**

Door Hinge 180°

with a 180° opening angle.

Material: aluminum

Finish: black anodized

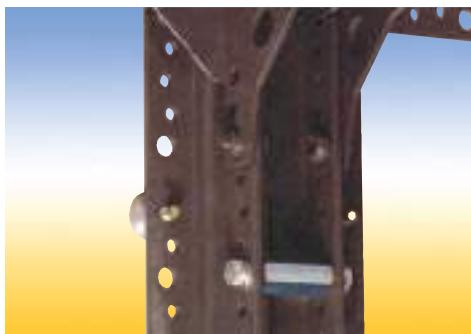

Delivery:

3 hinges, 3 hinge pins

Mounting parts

order no.: **409. 069 369**

Standard Adaptor, Lifting Eye, Document Box, Custom Logo Strip for Cabinets

Standard Adaptor Kit

To bolt together additional cabinets.

Material: steel

Finish: galvanized, passivated

Delivery: 8 threaded spacers

Mounting parts

order no.: **409. 132 464**

Lifting Eye Kit

Material: steel

Finish: galvanized, passivated

Delivery: 4 lifting eyes

Mounting parts

order no.: **409. 132 735**

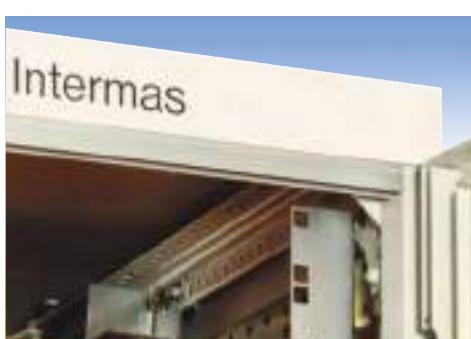

Document Box

DIN A4, upright, self adhesive

Material: Polystyrene, shock resistant

Finish: RAL 9002

order no.: **409. 068 760**

Custom Logo Strip

For the rack above the door.

Self adhesive

Material: aluminum 2 mm thick

Finish: anodized (paintable and printable)

Housings Desktop Housings

InterMeZo Housing

- ✓ Design front
- ✓ Functional front
- ✓ Variable in three dimensions
- ✓ Can be RFI-shielded
- ✓ Mechanical protection up to IP 54

InterCase Desktop Housing

- ✓ Easy construction
- ✓ Service friendly
- ✓ Variable dimensions
- ✓ Can be RFI-shielded

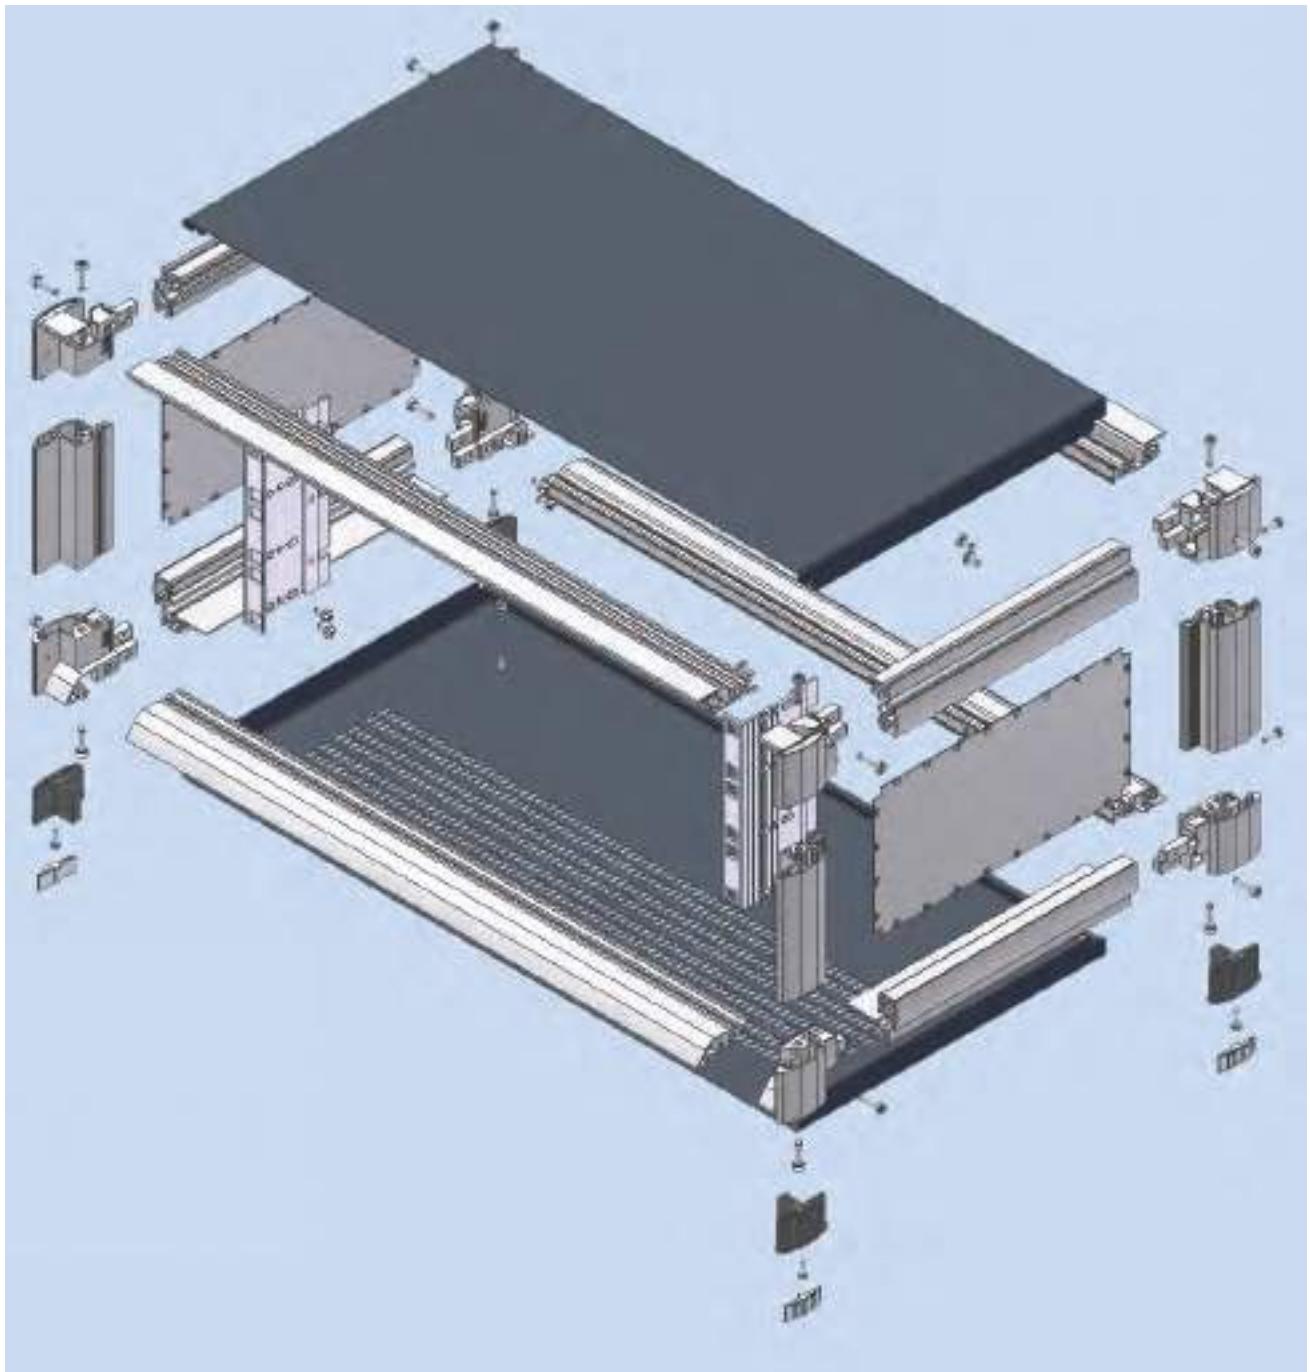

InterLock Housing

- ✓ Covering of subracks
- ✓ Easy mounting without screws

InterMeZo Housing

Requirements

A modern housing flexible in its applications, with a modular design, can be RFI-shielded and ventilated, in an attractive design and at a reasonable price: InterMeZo

Construction

1. Housing frame

The InterMeZo housing is based on a framework construction consisting of profiles and corner connectors. This flexible design also enables fast and cost-effective assembly of individual housing sizes.

2. Easy to access

For quick access to the installed electronics the cover plates are pressed into profiled grooves and secured with two screws.

3. RFI shielding

The side walls are pressed into profile grooves; contact elements ensure RFI-shielded bonding. To achieve effective protection of the housing against dust and water the cover panels, the rear wall and the door can all be fitted with seals.

4. Mechanical sealing

To achieve effective protection of the housing against dust and water the cover panels, the rear wall and the door can all be fitted with seals.

5. Recessed grips

Grips for easy transportation are formed by the recessed mounting of the side walls.

6. Equipment supports

Subracks can be installed variably as the housing depth permits.

7. Chassis panels

The depth profiles are provided with grooves in which chassis panels or similar can be fitted at any depth with the aid of spring nuts.

Summary

The InterMeZo housing from Intermas is a modular and cost-effective housing solution for high-quality industrial electronics in a visually attractive design, developed for the highest possible flexibility and simplest possible assembly, with expansion capabilities for more demanding needs, compliant with stringent EMI/ESD protection specifications, and with extensive configuration options to fulfil application-specific requirements.

Versions

The *InterMeZo housings* are available to assemble 19"- or metric subracks. Alternatively, any dimensions for variable applications are possible.

For all versions the possibility exists to choose between the following types.

1. Design front

This version has been constructed in terms of a harmonic front design for use with a wide range of applications.

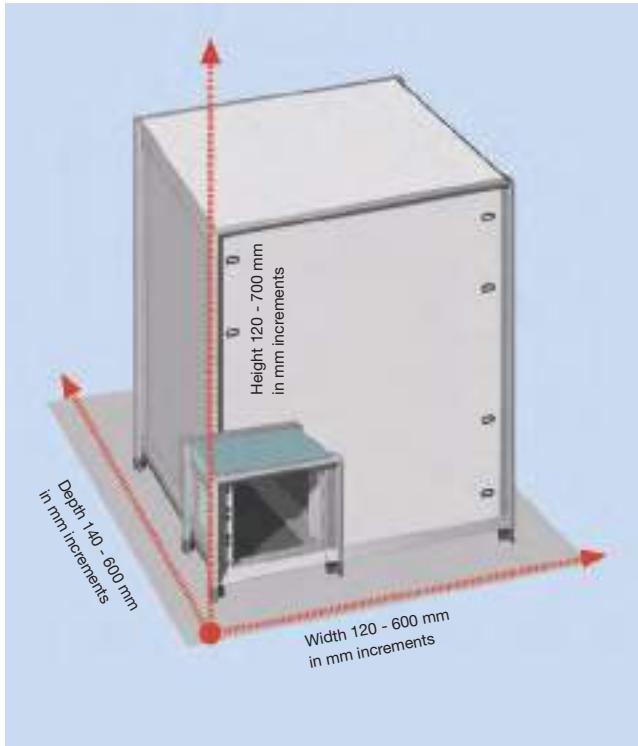

2. Functional front

For higher protection against dust and water as well as EMC shielding.

DiVar housing as individual housing

Description

The special design features of the DiVar housing:

- ✓ It consists of profiles into which aluminum, sheet steel, stainless steel or plastic panels with a thickness of 1.5 to 2.5 mm are inserted and, if desired, secured with screws. A wall panel at the rear and a panel at the front are screwed to the profiles.
- ✓ The flexible design allows variable configuration of the housing geometry in all three axes, this allowing adaptation of the housing to customer-specific requirements.
- ✓ Different surfaces can be selected for an individual appearance.
- ✓ The proven RFI contact spring concept ensures optimum RFI shielding.
- ✓ Rails with threaded holes can be pressed into the profile grooves, for example to screw in PCBs or mounting plates.
- ✓ The extensive range of Intermas accessories allows unrestricted configuration and installation of both standardized and non-standard components.

The housing can be supplied in 4 versions:

1. Customized housing
2. 19" rack mounted
3. Desktop housing with a keyboard area
4. Desktop housing with a continuous slanting surface

Housings *InterShell IP*

Painting examples of the *InterShell IP*

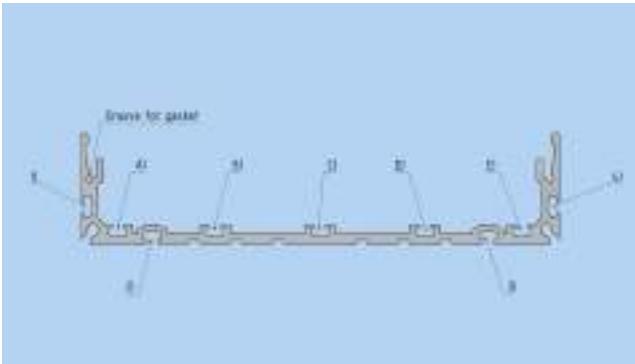

Description

The *InterShell IP* - perfect heavy duty housing. For euroboard cards and customised electronic applications.

Due to its robustness and tightness up to IP65 it is particularly suitable for mobile applications in the outdoor area as well as desk housing for measuring and test equipment. It is also possible to use the interior for subrack 3HE 42TE.

The small housing *InterShell IP* stands out due to its particular constructive features:

- ✓ The notches outside of the profile can be used for threaded strips (pos. 1-4) or for fittings like clip-angle or stock mounting.
- ✓ The notches internal the profile (5x, pos. A-E) are used for threaded strips and for additional parts like card guides.
- ✓ Alternative surface treatments, e.g. colorless passivation or varnishing of all visible surfaces are possible.
- ✓ Front panel and rear panel are made of 3mm metal sheed. On request, cut-outs for connectors as well as individual printing are possible.
- ✓ Sidewall, front and back panel are made of bright sea water resistant aluminum. Surface treatments are also possible.
- ✓ Front and rear panel are each fitted with 4 counter-sunk screws.
- ✓ A sealing ($\varnothing 2\text{mm}$) can be inserted between the profile and the plugged-in side panel to protect against extraneous particles and splashed water.
- ✓ The use of high-quality silicone sealings provides an optimal protection against foreign particles and moisture.
- ✓ Optionally, two conductive variants of sealings are available in order to obtain an optimal EMC-shielding
 - Silicone filled with particles of nickel-plated graphite
 - Fluorosilicone filled with conductive particles of silver-plated aluminum
- ✓ Feet-kit is available as an option and can be ordered separately.

Position of the notches and sealings

Delivery :

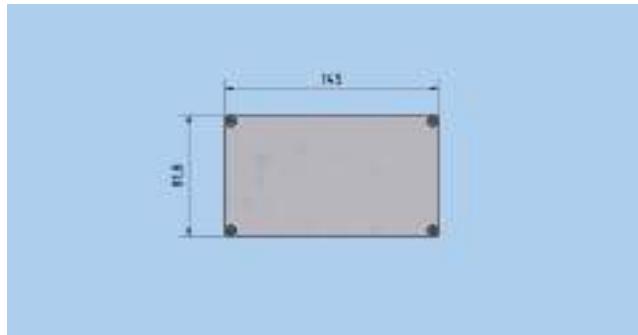

The housings are delivered unassembled as kits. They are packed - depending on quantity - either as kits or same parts packed together.

Upon request, the housings can also be delivered completely assembled and wired according to your requirements.

Technical changes and errors reserved.

Subrack *FLEXIBLE*

- ✓ Simple and fast assembly
- ✓ All-purpose
- ✓ RFI shielding can be added later

Subrack *RFI-SHIELDED*

- ✓ High shielding effectiveness
- ✓ Individual internal layout
- ✓ Complies with the latest IEEE standards
- ✓ For VME / VME64x

Subrack *InterRail®*

- ✓ For tough physical demands
- ✓ Vibration-proof
- ✓ For use e.g. in railway engineering, traffic engineering, power station engineering

System-Modules CompactPCI

- ✓ Integrated bus board
- ✓ Integrated power supply unit
- ✓ Wired and tested
- ✓ Optionally with active cooling

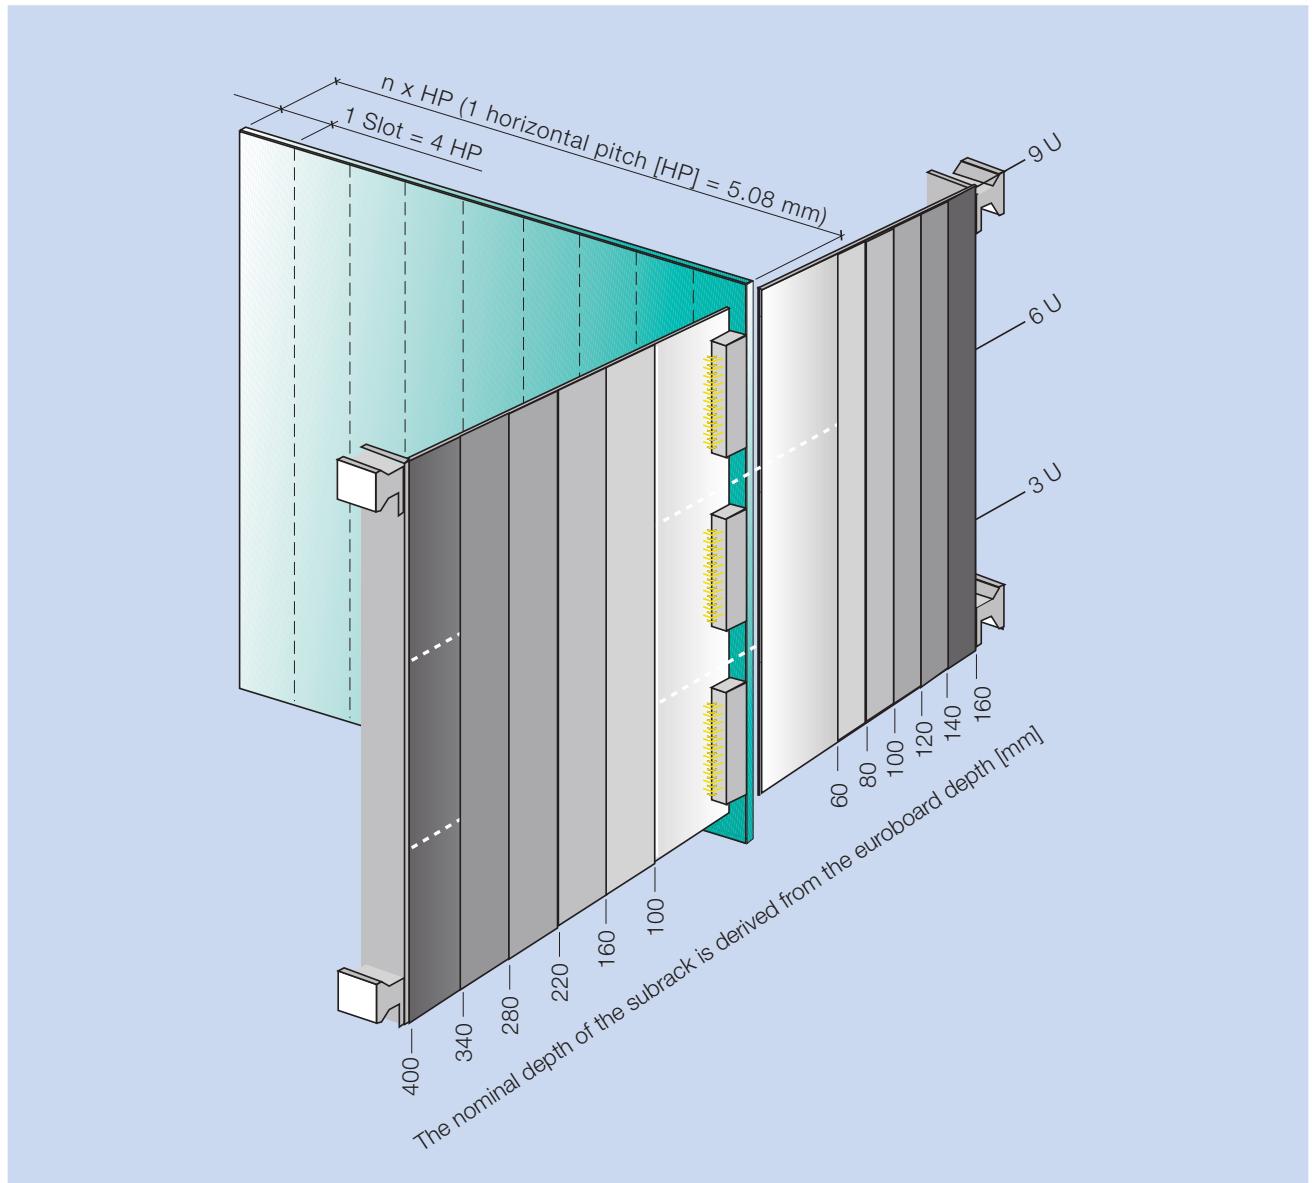

Subrack *InterProtect®*

- ✓ Shock and vibration resistant
- ✓ Water and dustproof
- ✓ Optimal HF-tightness

Systematics of the Intermas Subracks

Systematics

The illustration shows the systematics of the height, depth and width pitches of the Intermas-subracks.

The height of the subracks are in Units [U].

1 U is equivalent to 44.45 mm.

The nominal depth of the subracks is derived from the euroboard depth. Front inserted PCB's are generally specified in 60 mm-steps and for rear studded PCB's in 20 mm-steps.

For Intermas subracks depths in 10 mm-steps can be realized.

The width pitch is stated in horizontal pitches [HP].
1 HP is equivalent to 5.08 mm.

Busboards are specified in slots.

1 Slot is equivalent to 4 HP = 20.32 mm.

Structural Shapes of Subracks

There are three structural shapes, different in the wiring field.

1. Type *alpha*

The rear profiles are suitable for mounting any appropriate wiring carrier, e. g. bus and connector securing devices, used with insulation strips or Z-rails for mounting connectors according to DIN 41 612.

2. Type *beta*

The rear profiles with integral Z-rail are suitable for the direct mounting of connectors to DIN 41 612.

3. Type *delta*

The rear profiles are 2.6 mm deeper than in the type alpha, permitting direct mounting of multilayer backplanes and/or connector securing devices for mounting of DIN-connectors.

Please ask your local representative for your
individual system configuration.

Subrack **FLEXIBLE**

Subracks

Description

The special design features of the subrack *FLEXIBLE*:

- ✓ For mounting of the profile rails the side wall is perforated with a grid of 10 mm to allow installation of modules in depth steps of 10 mm. This results in a flexible amount of free space behind the wiring level or in front of the operating level.
- ✓ The profile rails are connected to the side wall at the front using a special screw which ensures electrical bonding of the parts via a ring cutter under the head.
- ✓ The front and rear profile rails can be interchanged such that the wiring level which is normally at the rear can be implemented at the front of the subrack.
- ✓ The extensive range of accessories allows individual configuration.
- ✓ Fast and simple assembly:
Easy positioning of the profile rails thanks to raised embossing on the side wall.
- ✓ There are 2 versions of this subrack:

1. The *FLEXIBLE Fi* subrack (with an integrated flange)

The combination of the side wall and mounting flange form a single unit. This is the simple and cost-effective version. This standard version can not be shielded.

2. The *FLEXIBLE Fs* subrack (with a separate flange)

The side wall and flange are separate components, so the flange can be screwed to the side panel at the front or the rear.

Advantages:

- Even if the flange is detached and repositioned from the front to the rear the subrack remains a physical unit and is thus also suitable for direct wall mounting.
- This version can be converted to an RFI-shielded subrack with little effort.

Mixed forms

For vertical mounting PCB's of varying heights, divider kits are available.

Delivery

Supplied as unassembled kits.

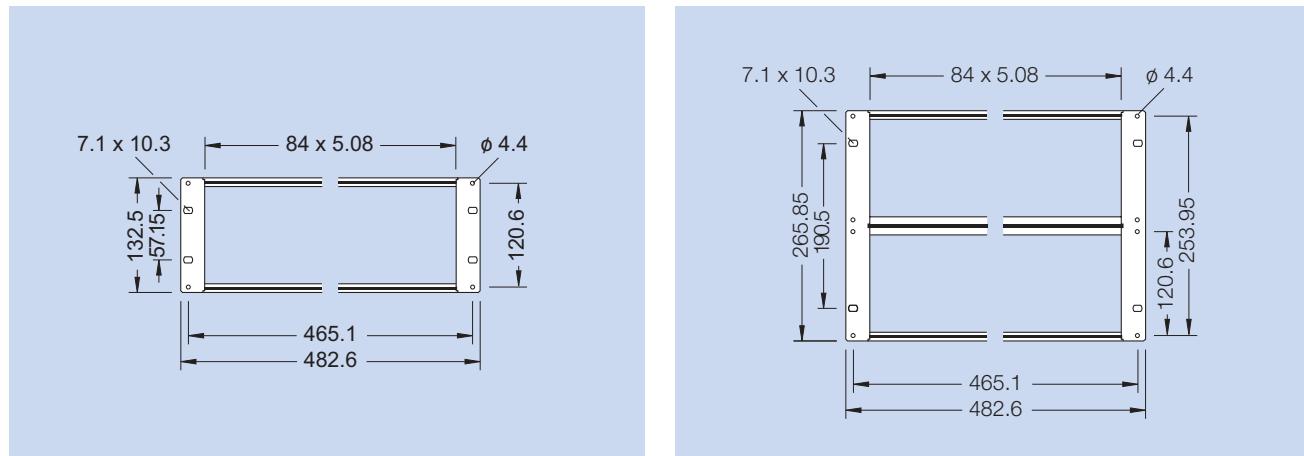

These are either packed as a kit of parts for one unit or as individual components, whereby parts of similar type are packed together.

On request, delivered as assembled and wired subrack according your requirements.

Subrack RFI-SHIELDED

Description

The system dimensions of the *RFI-SHIELDED* subrack are based on those of the *FLEXIBLE* subrack as a logical further development to produce the perfectly shielded subrack. This allows unrestricted use of the extensive and complete range of accessories.

The special design features of the *RFI-SHIELDED* subrack:

- ✓ The refined RFI shielding concept enables high shielding effectiveness.
- ✓ The stable stainless steel contact springs ensure permanent and reliable bonding, even after a large number of plug-in cycles.
- ✓ The perforated RFI cover plates guarantee optimal air flow for improved heat dissipation.
- ✓ The use of high-quality, seawater-resistant aluminum alloys and stainless steel materials removes, for the most part, the need for unnecessary, environmentally harmful surface treatment.
- ✓ There are three versions of this subrack:

1. Subrack RFI-SHIELDED

The standard RFI-shielded version.

2. Subrack RFI-SHIELDED IEEE

The front is in accordance with IEEE 1101.10.

The special profile rail is designed for the use of insertion and removal handles (optionally with a hot-swap function) for overcoming high insertion and removal resistance.

The card guides are fitted with mechanical coding systems and special bonding for electrostatic discharge.

3. Subrack RFI-SHIELDED IEEE / Rear I/O

The front and the rear are in accordance with IEEE 1101.10/11. This enables insertion and removal of modules with a front panel from both the front and the rear of the subrack.

Mixed forms

For vertical mounting PCB's of varying heights, divider kits are available.

Delivery

Supplied as unassembled kits.

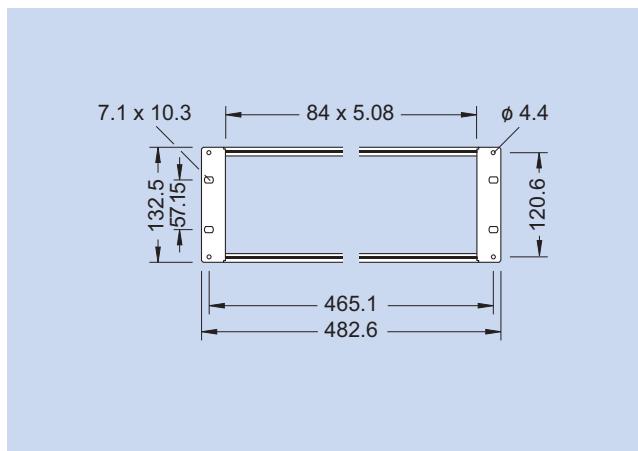

These are either packed as a kit of parts for one unit or as individual components, whereby parts of similar type are packed together.

On request, delivered as assembled and wired subrack according your requirements.

Measurement Configuration, Tests, Measurement Results

Shielding efficiency as function of grade of perforation of the covers

1. Measurement configuration

The measurement configuration fundamentally complies with the requirements of VG 95 373, Part 15, measurement method KS 04 G.

The subrack stood in the middle of a shielded anechoic chamber. The receiver antenna was in the center of the subrack and the transmitter antenna was mounted at a distance of 1 m from it.

The subrack was positioned such that the perforated cover panel faced the transmitter antenna.

The measurement receiver was located inside the measurement chamber, approximately 2 m from the test object; the measurement transmitter and amplifier were outside the chamber.

2. Tests

All measurements were performed at a constant transmitter output of -5dBm at 50V. The series of measurement was performed with a free-standing receiver antenna. The next measurements were then performed with the receiver antenna inside the subrack. The shielding effectiveness SE [dB] is the difference between the measurement levels obtained. Two subrack types were tested, one with a perforated cover panel and one with a solid cover panel. Perforation diameters of 3-8 mm essentially lead to the same result:

The two related measurement curves can be seen in the diagram above.

Frequenzy steps

| Frequenzy range [MHz] | Measurement step [MHz] |
|-----------------------|------------------------|
| 30 - 70 | 2 |
| 70 - 100 | 5 |
| 100 - 200 | 10 |
| 200 - 1000 | 20 |

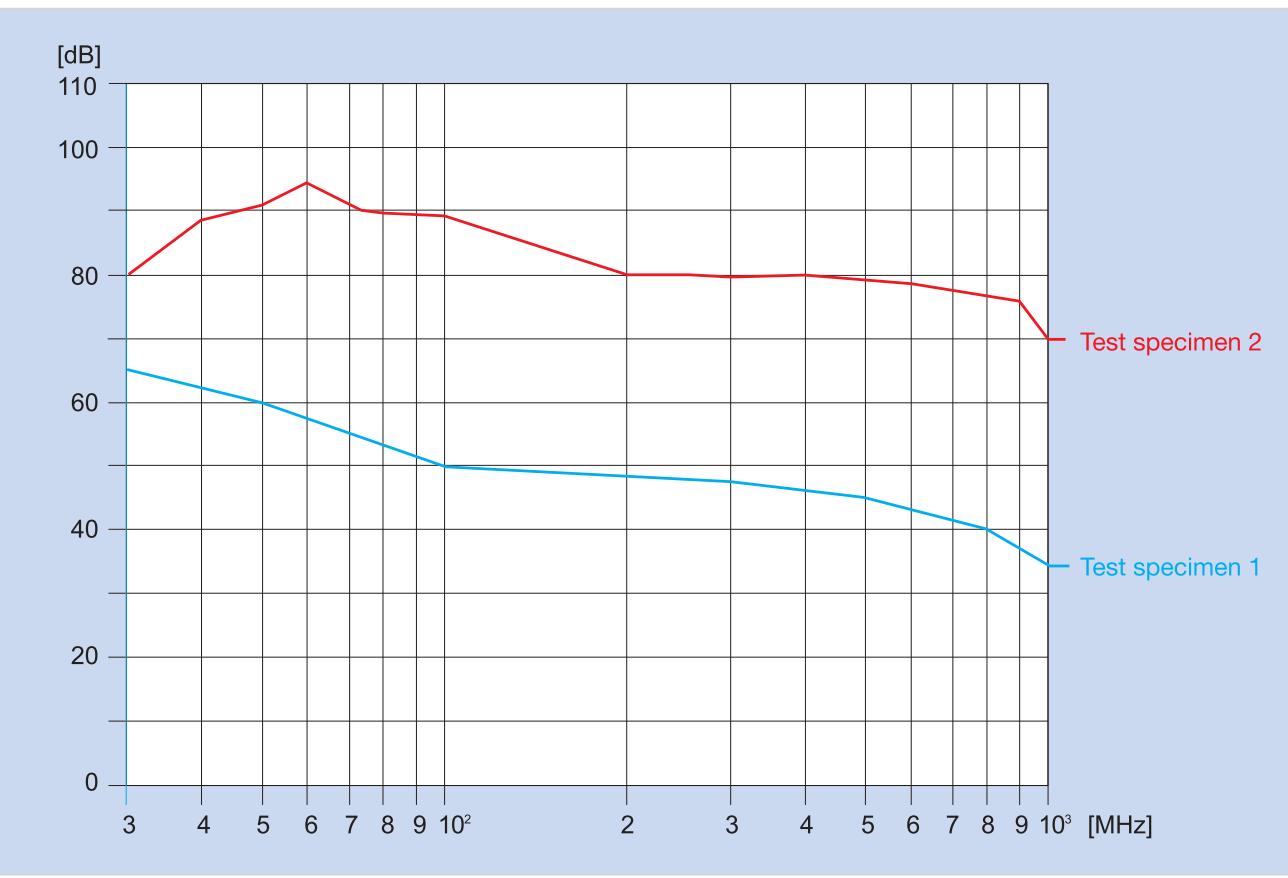

3. Measurement results, summary

Compared to the subrack with a perforated cover panel the subrack with a solid cover panel exhibits a significantly higher level of shielding effectiveness, on average 20 dB higher in the lower frequency range (30 - 180 MHz) and on average 40 dB higher in the upper range (180 MHz - 1 GHz).

Above approximately 800 MHz the shielding effectiveness is determined by the distances between the contact points between the subrack and the front panels.

For subracks in accordance with IEEE P 1101.10 this boundary frequency lies at 1.2 to 1.5 GHz depending on the subrack design.

Tests, Measurement Results

Shielding effectiveness

Shielding effectiveness

The shielding effectiveness of the empty subrack was determined in accordance with VG 95 373, Part 15.

Testing organisation

The measurements were performed in the Siemens Institute for Quality Engineering, Testing and Certification in Munich, Germany.

Test object

Two subracks with a height of 6 U, a width of 84 HP and a depth of 320 mm were tested:

Test specimen 1

Subrack 1 was closed at the top and bottom with perforated cover panels ($\varnothing 4/5 \times 4$ mm), at the rear with an 85 HP front panel and at the front with twenty-one 4 HP profile front panels.

The elements were bonded to each other via stainless steel RFI gaskets.

Test specimen 2

Subrack 2 was closed at the top and bottom with solid cover panels and at the front and the rear with an 85 HP front panel. The elements were bonded to each other via stainless steel RFI gaskets.

Advice on use

To achieve optimal shielding the subrack must be closed at all sides using RFI gaskets, i.e. it must be fitted at the front and the rear with front panels or sub-assemblies.

Implementation of the Shielding

The RFI-SHIELDED subrack is fitted with stainless steel springs on all sides for defined bonding of all individual elements to each other. The only exceptions are the transitions of the cover plates to the side panel. In this case the bonding is performed using multiple screw connections at short distances from one another. The use of RFI front panels with bonding points at the side and bonding areas in the case of the extruded profile front panel results in a shielded subrack with shielding effectiveness levels as shown in the diagram below.

The details of the technical implementation using stainless steel springs:

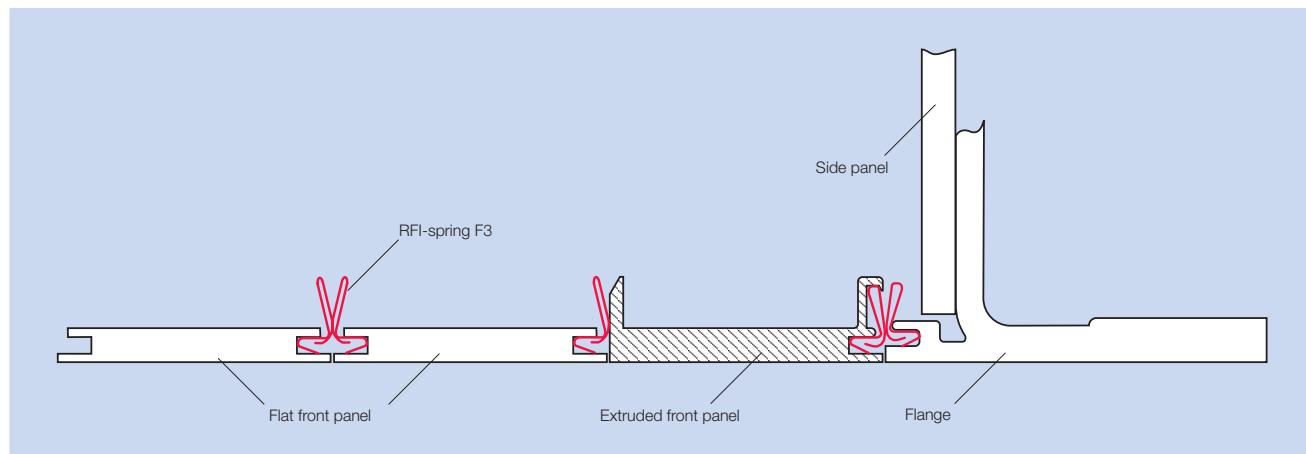

1. Bonding of the cover panel to the profile channel via the RFI spring A2 which is inserted into the groove of the profile.
2. The RFI spring P2 is snapped onto the profile channel at both the front and the rear and at its front face creates the bonding to the front panels and the rear wall.

3. The RFI spring F3 is used in the subrack flange. This spring is also used at the sides of the RFI front panels and creates the bonding between the front panels and between the front panel and the flange or side panel.

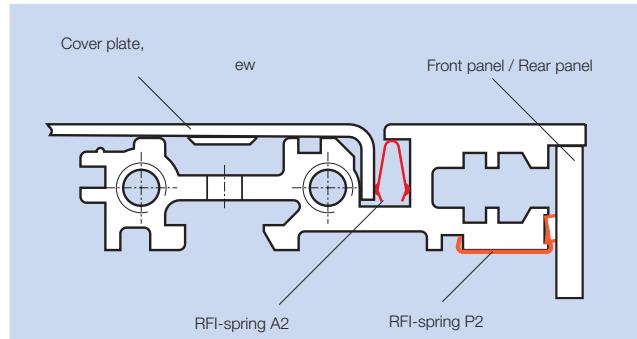

4. The cover panel is screwed directly to the side panel; springs are thus not necessary here.

The subrack, its paneling elements and the cover panels are made of high-quality seawater-resistant aluminum alloys.

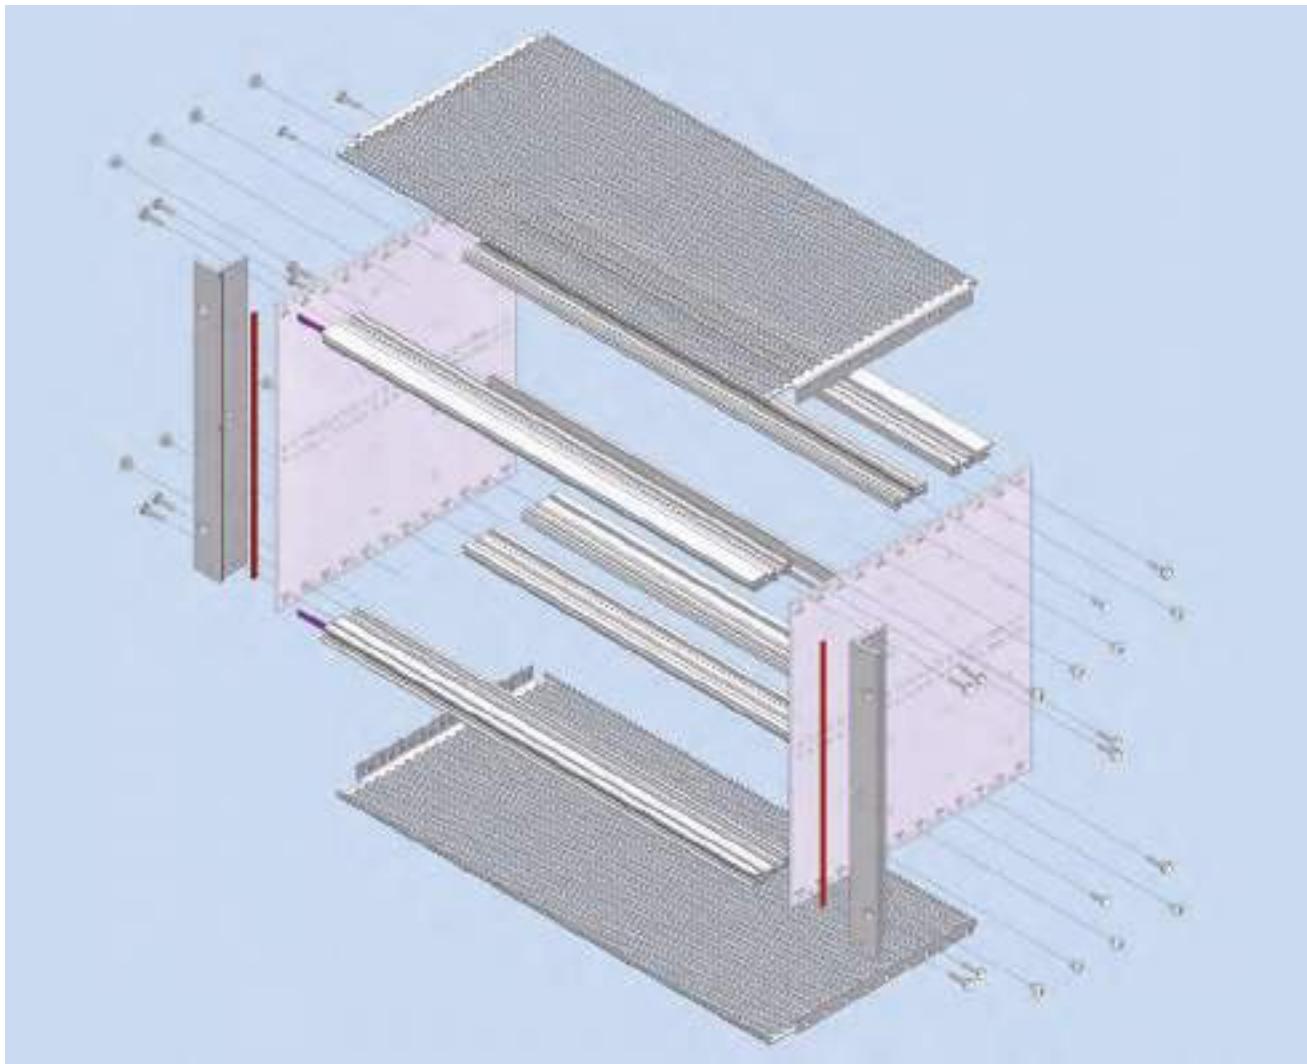

The spring strips are made of stainless steel. This well-balanced combination of materials and surface treatment ensures high corrosion and ageing resistance and achievement of the necessary low contact resistance between the individual elements.

Sealing of the vertical splices between the front panels and between front panel und flange

Subrack *InterRail*®

Description

The system dimensions of the *InterRail* subrack are based on those of the *FLEXIBLE Fi* as a logical further development to produce a subrack for heavy-duty use. This allows unrestricted use of the extensive range of accessories.

The special design features of the *InterRail* subrack:

- ✓ Profile rails with a high section modulus guarantee resistance to vibrations.
- ✓ The refined RFI-shielding concept enables high shielding effectiveness (see the RFI-SHIELDED chapter).
- ✓ There are four versions of this subrack:

1. Subrack *InterRail*

Shielding is not possible for the unsealed version.

2. Subrack *InterRail RFI*

The RFI-shielded version.

3. Subrack *InterRail RFI - IEEE*

The front is in accordance with IEEE 1101.10.

The special profile rail is designed for the use of insertion and removal handles (optionally with a hot-swap function) for overcoming high insertion and removal resistance. The card guides are fitted with mechanical coding systems and special bonding for electrostatic discharge.

4. Subrack *InterRail SNCF*

The special subrack with the certification from the French Railways.

Mixed forms

For vertical mounting PCB's of varying heights, divider kits are available.

Delivery

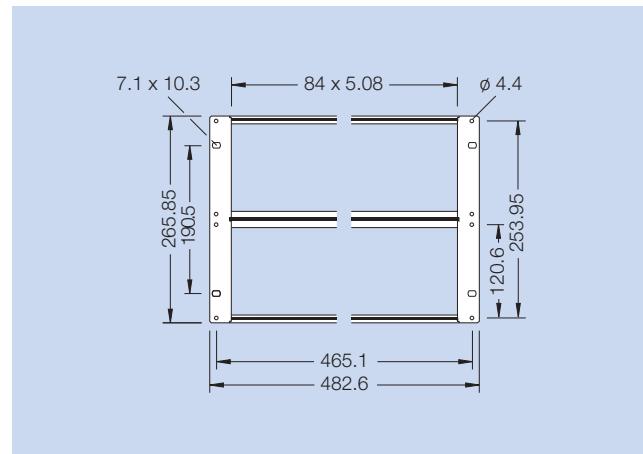

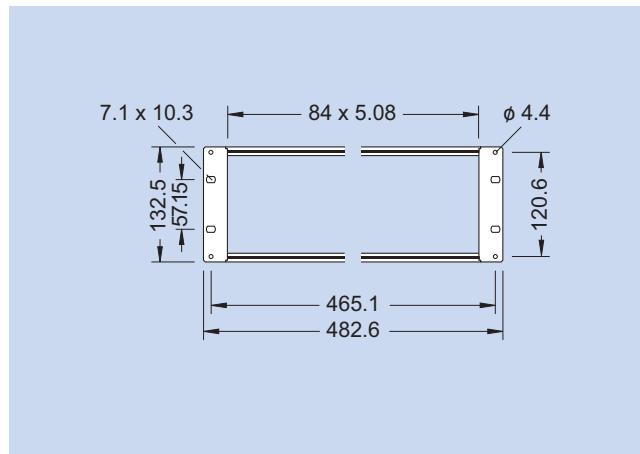

Supplied as unassembled kits.

These are either packed as a kit of parts for one unit or as individual components, whereby parts of similar type are packed together.

On request, delivered as assembled and wired subrack according your requirements.

Technical data

| | |
|-----------------------------|--|
| Standards | IEC 60297, DIN 41 494, IEEE 1101.10, DIN EN 50 155 NF F 60-002, NF F 61-012, NF F 67-012 |
| Width / horizontal pitch | 84 usable HP / 5.08 mm (36 HP at SNCF) |
| Depth of the inserted board | 160, 220, 280 mm (nom. depth) |
| Connector mounting | M 2.5 in increments of 5.08 mm for connectors, DIN 41 612, VG 95 324 and EC 60603-2 |
| Materials | screws: steel contact springs: stainless steel or tin-plated other parts: aluminum |
| Finish | screws: galvanized und chromated other parts: chromated |
| Protection class | DIN 40 050 IP 20 (with cover plates) contact protection in accordance to VDE 0160 |
| Utilization category | -25 °C, +70 °C, 75% relative humidity |
| Protective grounding | all metal parts are electrically bonded to one another following assembly in accordance with VDE 100 D 12.65, § 6 Nb. |

Dimensions

■ **Testing in accordance with DIN EN 50 155**

The tests are passed if no damage or malfunctions are determined.
The tests are performed from 5 to 150 Hz with the assigned accelerations and amplitudes.

■ **Tests in accordance with SNCF NF standards**

The tests are passed if the maximum resonance sharpness of ca. 10 g is not exceeded in any axis.

Measurement results with non-stiffened boards

Excerpt from the results of the measurements in the Y-axis, measurement on the front profile rail:
Maximum resonance sharpness 10.8 g at 52.5 Hz.
Measurement at the rear on the side panel extension:
Maximum resonance sharpness 9.6 g at 52.5Hz (see the measurement curve).

Certification

Based on development and manufacture certified in accordance with DIN ISO 9001 this SNCF-tested subrack complies with the SNCF standards

NF F 60-002 (testing standard),
NF F 61-005 (dimensions standard),
NF F 67-012 (test boards)
and DIN EN 50 155.

In addition to being certified for railway applications the InterRail subrack is also approved for use with the French National Railways.

Test specimen

Subrack with dimensions H = 6 U, W = 84 HP,
D = 220 mm

Test sequence

The following tests were performed in the 3 axes X, Y and Z on the subrack with the PCB configuration listed below:

- Determination of the critical resonance frequency
- An endurance test at the resonance frequency The vibration excitation was performed between 7 and 70 Hz at a constant acceleration of 1 g in 12 cycles each lasting 10 minutes.

In total the subrack was vibrated for eight hours, 2 hours each with the following alternating board configuration:

1. In the X-axis
21 x 420 g boards
2. In the Z-axis
21 x 420 g boards
3. In the Y-axis
21 x 240 g boards
4. In the Z-axis
4 x 420 g boards plus a 6.22 kg cassette installed in the center.

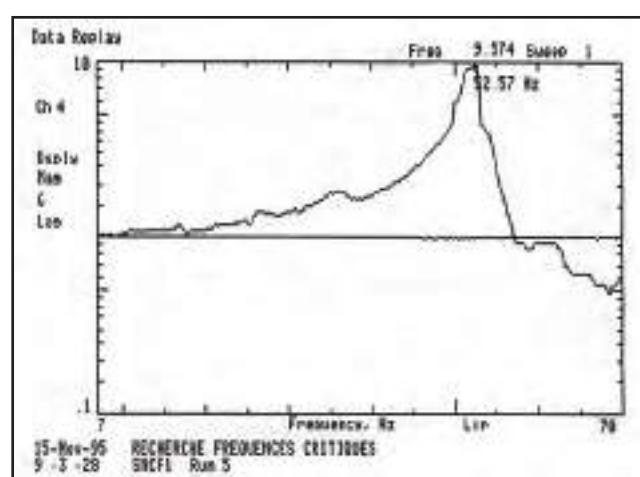

Measurement results with stiffened boards

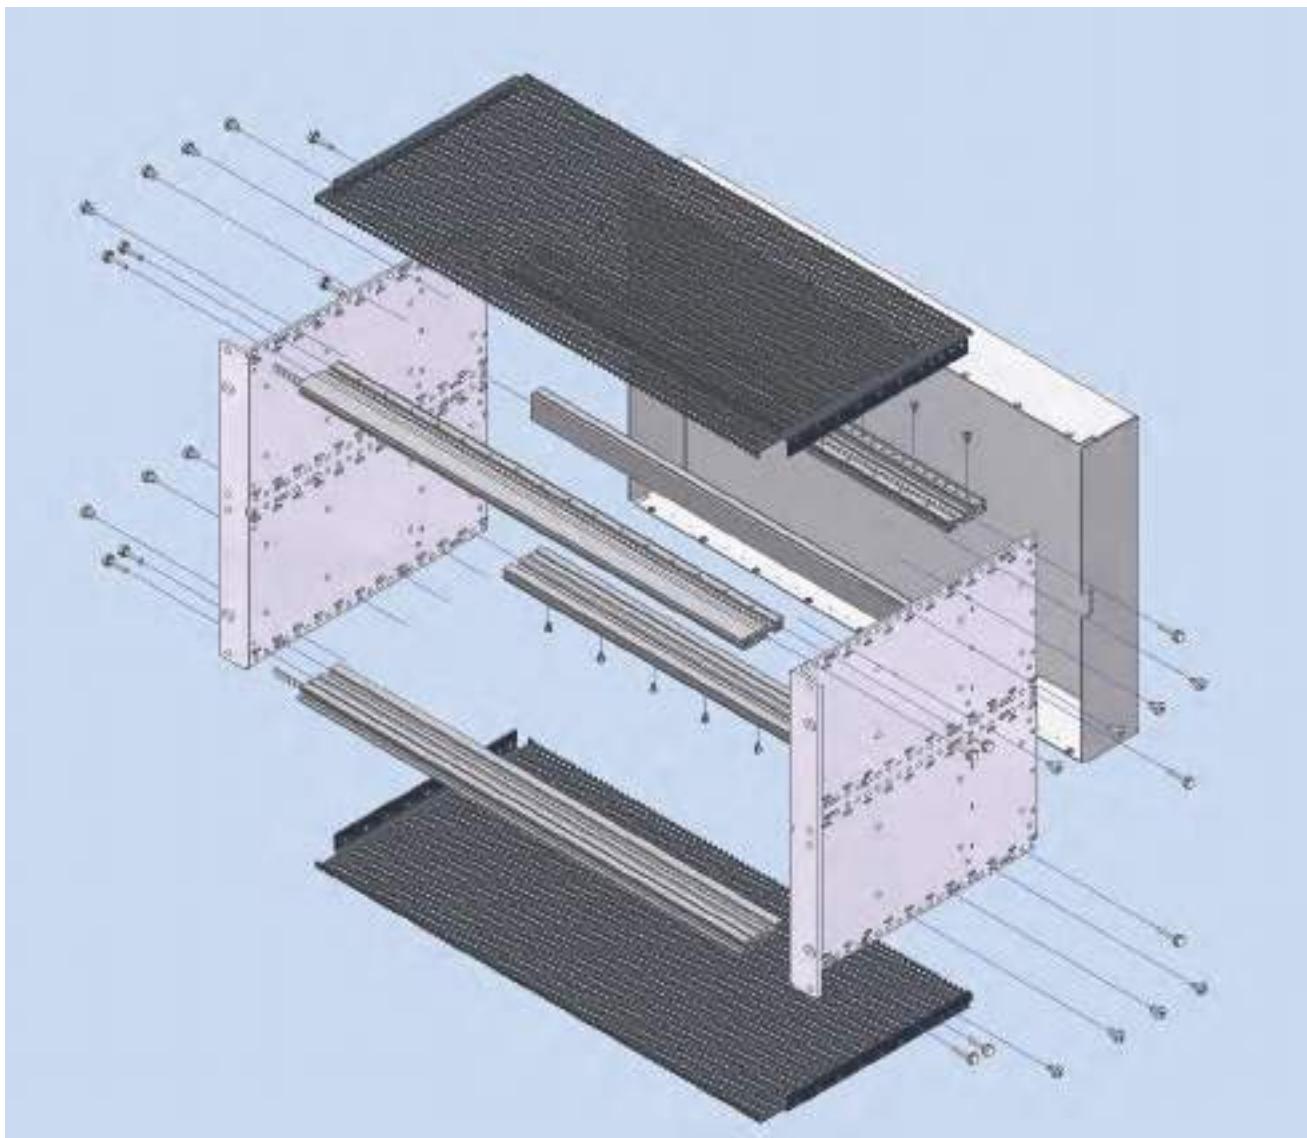

These measurements are not demanded by the testing standard but were nonetheless also performed.
Excerpt from the results of the measurement in the Y-axis, measured on the front profile rail:
Maximum resonance sharpness 7.6 g at 47.1 Hz.

Measurement at the rear on the side panel extension:
Maximum resonance sharpness 6.5 g at 47.1 Hz.

Test result

Following vibration for a total of 8 hours the test specimen showed no signs of damage.

System-Module CompactPCI

Subracks

Description

The special design features of the CompactPCI system modules:

- ✓ The refined RFI-shielding concept enables high shielding effectiveness (see the RFI-SHIELDED chapter).
- ✓ The construction offers additional space for drives and hard disks.
- ✓ They are fitted with an ATX 300 W power supply unit with a wide-range input and PFC.
- ✓ CPCI backplane in accordance with specification 2.0 Rev. 3.0, with or without rear I/O

✓ Convection or active ventilation

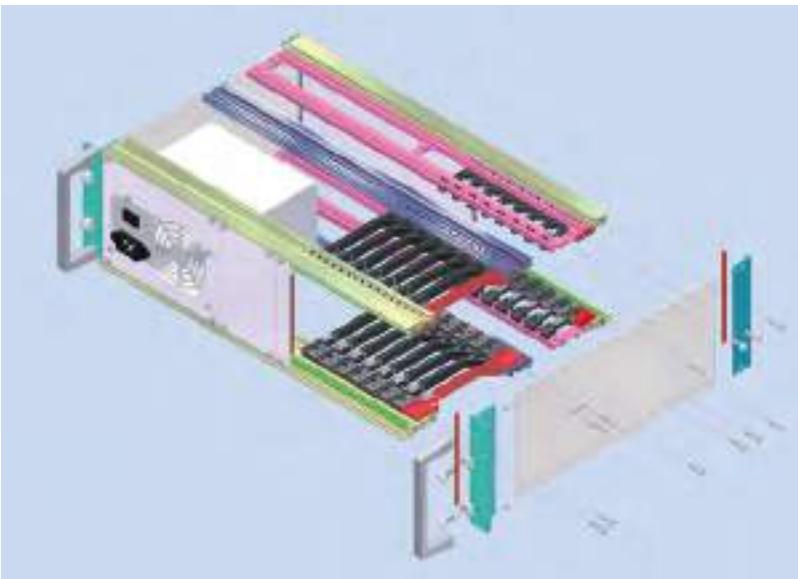

Delivery

The subrack is delivered assembled.

Other systems on request.

Technical data

| | |
|-----------------------------|--|
| Standards | compliant with DIN 41 494, IEC 60297-3, IEEE 1101.10 IEC 61 076-4-101, CPCI Specification 2.0, Revision 3.0 |

| Protective grounding | all metal parts are electrically bonded to one another following assembly in accordance with VDE 100 D 12.65, § 6 Nb. |

Subracks

Consists of:

- 1 Subrack *RFI-SHIELDED CPCI / REAR I/O 84 HP*,
260 mm nom. depth
(160 mm at the front, 80 mm at the rear)
- 1 Backplane 8 Slot, 3U, 32 Bit, system slot right
- 1 ATX 300W power supply unit with a wide-range input
and PFC, with assembled front panel.
- 1 Blind front panel 16HP at the front.
- 1 Blind front panel 4 HP at the front.
- 1 Blind front panel 48 HP at the rear.
- 1 Blind front panel 8 HP at the rear.
- 1 Pair of card guides red 160 mm (CPU)
including IEEE-coding and ESD-spring in the bottom card guide.
- 1 Pair of card guides red 80 mm (CPU)
including IEEE-coding and
- 7 Pair of card guides black 160 mm (CPU)
including IEEE-coding and ESD-spring in the bottom card guide.
- 7 Pair of card guides black 80 mm (CPU)
including IEEE-coding and ESD-spring in the bottom card guide.

System-Module CompactPCI- 3 U-Rear I/O and 6 U-Rear I/O

Subracks

System-Module CompactPCI-3 U-Rear I/O

order no.: 409. 122 295

Consists of:

- 1 Subrack *RFI-SHIELDED CPCI / REAR I/O*
84HP, 260 mm nom. depth
(160 mm at the front, 80 mm at the rear)
- 1 Backplane 8 Slot, 3U, 32 Bit, system slot right
- 1 ATX 300W power supply unit with a wide-range input and PFC, with assembled front panel.
- 1 Blind front panel 16HP at the front.
- 1 Blind front panel 4 HP at the front.
- 1 Blind front panel 48 HP at the rear.
- 1 Blind front panel 8 HP at the rear.
- 1 Pair of card guides red 160 mm (CPU)
including IEEE-coding and
ESD-spring in the bottom card guide.
- 1 Pair of card guides red 160 mm (CPU)
including IEEE-coding and
ESD-spring in the bottom card guide.
- 7 Pair of card guides black 160 mm (CPU)
including IEEE-coding and
ESD-spring in the bottom card guide.
- 7 Pair of card guides black 80 mm (CPU)
including IEEE-coding and
ESD-spring in the bottom card guide.

System-Module CompactPCI-6 U-Rear I/O

order no.: 409. 122 297

Consists of:

- 1 Subrack *RFI-SHIELDED CPCI / REAR I/O*
84HP, 260 mm nom. depth
(160 mm at the front, 80 mm at the rear)
- 1 Backplane 8 Slot, 6U, 64 Bit, system slot right
- 1 ATX 300W power supply unit with a wide-range input and PFC, with assembled front panel.
(optional front panel for a drive over the power supply).
- 1 Blind front panel 16HP at the front.
- 1 Blind front panel 4 HP at the front.
- 1 Blind front panel 48 HP at the rear.
- 1 Blind front panel 8 HP at the rear.
- 1 Pair of card guides red 160 mm (CPU)
including IEEE-coding and
ESD-spring in the bottom card guide.
- 1 Pair of card guides red 80 mm (CPU)
including IEEE-coding and
ESD-spring in the bottom card guide.
- 7 Pair of card guides black 160 mm (CPU)
including IEEE-coding and
ESD-spring in the bottom card guide.
- 7 Pair of card guides black 80 mm (CPU)
including IEEE-coding and
ESD-spring in the bottom card guide.

System-Module CompactPCI - 6+3 U-Rear I/O and 4 U-Rear I/O

System-Module CompactPCI-6+3 U-Rear I/O

order no.: 409. 122 301

Consists of:

- 1 subrack *RFI-SHIELDED CPCI / REAR I/O*
84HP, 260 mm nom. depth
(160 mm at the front, 80 mm at the rear)
- 1 Backplane 8 Slot, 6U, 64 Bit, system slot right
- 1 ATX 300W power supply unit with a wide-range input and PFC, with assembled front panel.
(optional front panel for a drive over the power supply).
- 1 Blind front panel 16HP at the front.
- 1 Blind front panel 4 HP at the front.
- 1 Blind front panel 48HP at the rear.
- 1 Blind front panel 8HP at the rear.
- 1 Fan drawer with integrated fan.
- 1 Pair of card guides red 160 mm (CPU)
including IEEE-coding and ESD-spring in the bottom card guide.
- 1 Pair of card guides red 80 mm (CPU)
including IEEE-coding and ESD-spring in the bottom card guide.
- 7 Pair of card guides black 160 mm (CPU)
including IEEE-coding and ESD-spring in the bottom card guide.
- 7 Pair of card guides black 80 mm (CPU)
including IEEE-coding and ESD-spring in the bottom card guide.

System-Module CompactPCI-4 U-Rear I/O

order no.: 409. 122 300

Consists of:

- 1 subrack *RFI-SHIELDED CPCI / REAR I/O*
84HP, 260 mm nom. depth
(160 mm at the front, 80 mm at the rear)
for horizontal embedded 6 U PCB's
- 1 Backplane 4 Slot, 6U, 64 Bit, system slot right
(1 Slot free e. g. for hard disk or driver)
- 2 Front panels 6U - 4HP (1 at the front, 1 at the rear)
- 1 ATX 300W power supply unit with a wide-range input and PFC, with integrated 32 HP Front panel at the front.
- 1 Fan
- 1 Pair of card guides red 160 mm (CPU)
including IEEE-coding and ESD-spring in the bottom card guide.
- 1 Pair of card guides red 80 mm (CPU)
including IEEE-coding and ESD-spring in the bottom card guide.
- 4 Pair of card guides black 160 mm (CPU)
including IEEE-coding and ESD-spring in the bottom card guide.
- 4 Pair of card guides black 80 mm (CPU)
including IEEE-coding and ESD-spring in the bottom card guide.

Description

Special design features of the subrack InterProtect®:

- ✓ Upper and lower cover are made of a solid extruded aluminium profile. The surface is passivated
- ✓ Profiles have 11 screwing points on each side in order to fix the side panels.
- ✓ Profiles are equipped with channels to insert mounting or threaded strips. These strips are designated to fix frontpanel, rear wall, card guides and connectors resp. backplanes.
- ✓ Connector and backplane sections can be realized with nominal depth of 160, 180, 220 und 240 mm.
- ✓ Card guides with a nominal depth of 160 and 220 mm, optionally snap-in or screwable can be used.
- ✓ The side walls, front panel and rear wall are made of seawater resistant aluminium. They have a material thickness of 4 mm and are passivated.
- ✓ Front panel and rear wall are each fixed with 28 (42HP) resp. 52 (84HP) screws on the 3U subrack, and with 36 (42HP) resp. 60 (84HP) screws on the 6U subrack.
- ✓ The usage of high-quality sealing materials guarantees an optimal protection against dirt, dust and the intrusion of water.
- ✓ An optimal shielding is achieved by the usage of conductive sealings.
- ✓ Sealings are made of silicone resp. the conductive variant of silicone, filled with particles of nickel-plated graphite. Upon request it is also possible to use sealings made of fluorine silicone or of conductive particles of silver-plated aluminum.

Delivery form:

Supplied as unassembled kits.

These are either packed as a kit of parts for one unit or as individual components, whereby parts of similar type are packed together.

On request, delivered as assembled and wired subrack according your requirements.

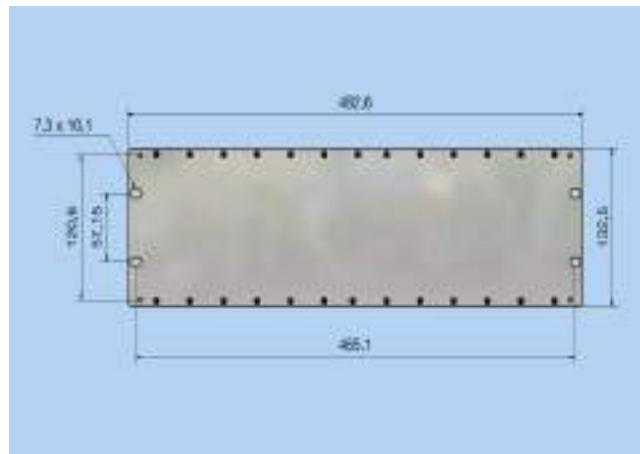

Subrack *InterProtect*[®]

Technical Data

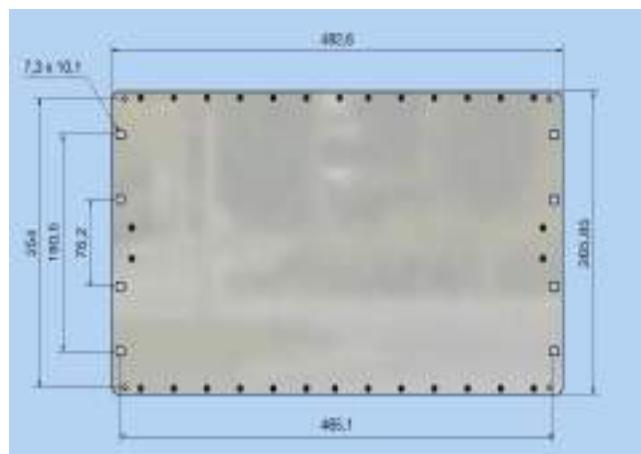

| | |
|---------------------------------|--|
| Dimension | Acc. to DIN 41 494/ IEC 60 297 |
| Width / horizontal pitch | 84 / 42 usable HP / 5,08 |
| Depth of backplane | 160, 180, 220, 240 mm (Nominal depth) |
| Attachment of plug-in connector | M 2,5 as grid of 5,08 mm for plug-in connectors acc. to DIN 41 612, VG 95 324, IEC 60 603-2 |
| Materials | screws: stainless steel, assembly and threaded strips: steel or stainless steel, other parts: aluminium |
| Surfaces | aluminium parts: passivated, steel parts zink-cromated and passivated |
| Protection class | acc. to DIN EN 60529, IP66 |
| Temperature range | -55 to +160 °C |
| Protective earthing | After assembly all metal parts have an electrically conductive interconnection acc. to VDE 100/12.65, § 6 Nb |

- 2 Sealing left and right
- 2 Sealing F/R

Realisation of the shielding

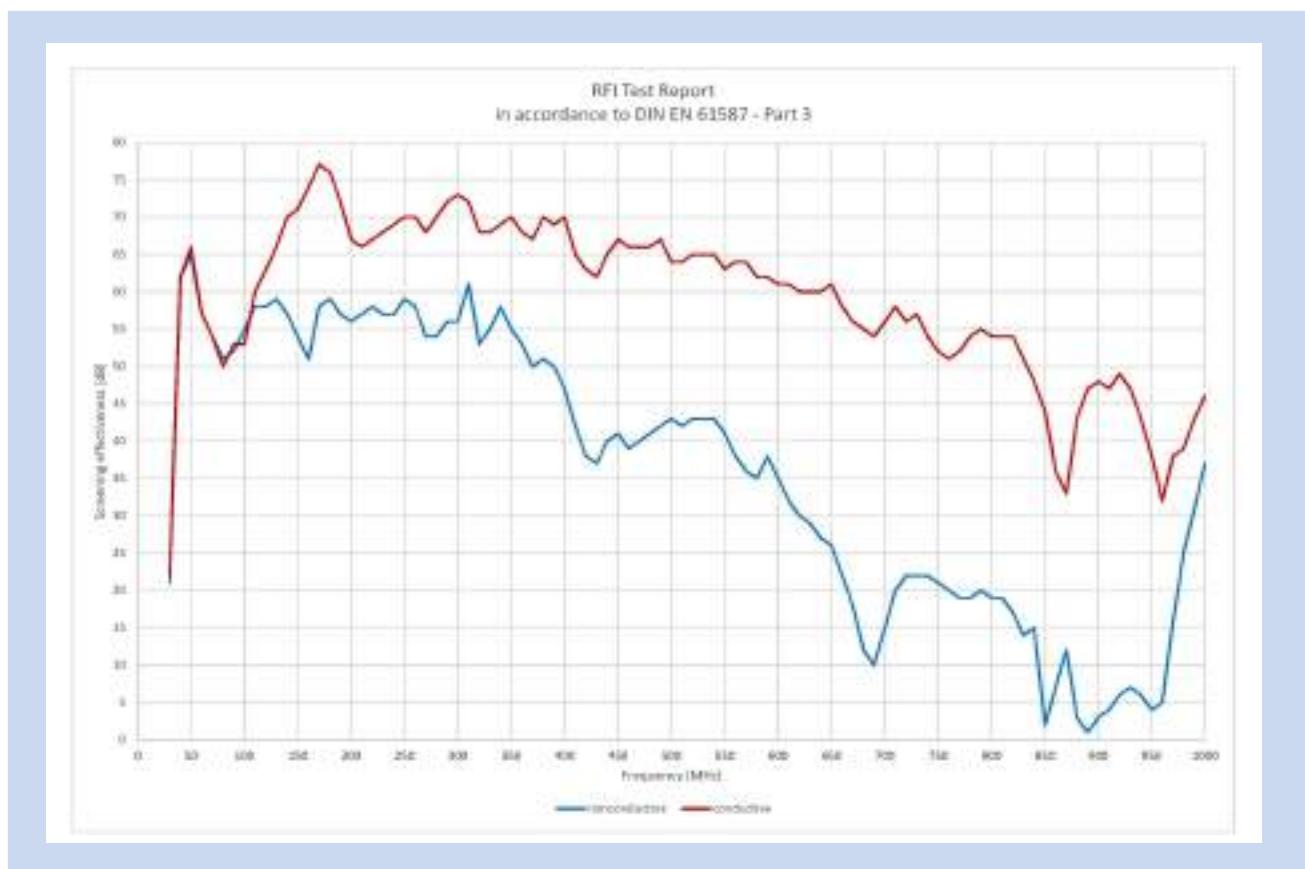

Subrack 3U

Subrack 6U

Measurement configurations *InterProtect®*

Subrack

Shielding effectiveness depends on the material of the used sealing material.

Shielding effectiveness:

The shielding effectiveness of the empty subrack was determined in accordance with DIN EN 61 587-Part 3.

Testing institute:

The measurements were performed at hummel electronic in Fellbach, Germany.

Test specimen 1

This subrack was equipped with sealings made of silicone, filled with particles of nickel-plated graphite.

Test specimen 2

This subrack was equipped with sealings made of silicone.

Subrack Divider

Assembly:

The short horizontal rails are assembled to the side panel. The dividing strip is inserted into the horizontal rail groove, fixed with a rotating motion and mounted on the short horizontal rails.

Positioning note:

For optimum use of available space in the subrack, PCB's of 6 U should be mounted left, and the 3 U on the right. In this case the dividing strip requires only 1 HP, otherwise 2 HP for the necessary air and leakage paths.

for subrack **FLEXIBLE** and **RFI-SHIELDED**

Subrack Divider Kit

2 x 3 U - 42 HP and 6 U - 40 HP

The divider separates a 6 U subrack into a field for 6 U PCB's and 2 fields of 3 U.

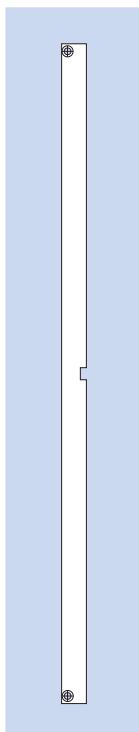

Finish: passivated

Delivery:

- 1 double front profile
2xVE1-43 HP chromated
- 1 double rear profile
2xHK-43 HP anodized
- 2 divider strips
- Mounting parts

order no.: **409. 082 063**

Single Parts

Blind Front Panel for Subrack Divider

For covering of the divider strip. Optional with RFI-springs for a RFI shielded front.

Material: aluminum
Finish: passivated
Dimensions: 2 HP x 6 U

order no.: **409. 116 319**

Accessories

Accessories

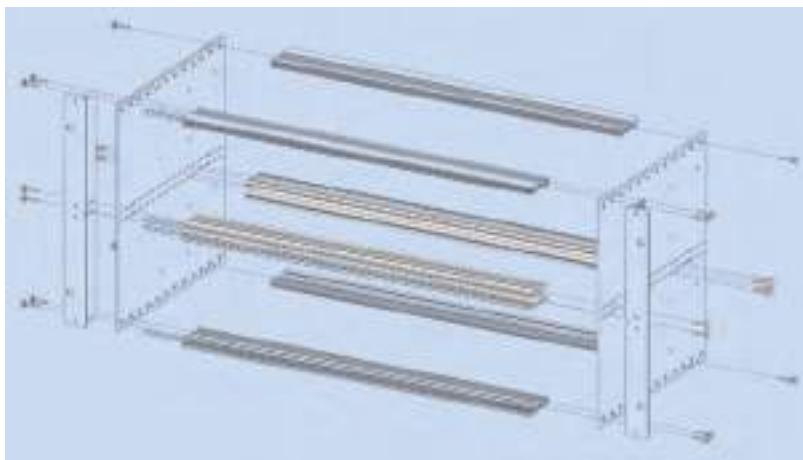

Counter sunk screw **M 4 x 16**

For assembly of the divider strip to the horizontal rail:

Minimum order quantity 100 pieces

order no.: **409. 107 342**

Subrack Divider, Horizontal Mounting Frame

for subrack **FLEXIBLE** and
RFI-SHIELDED

Subrack Divider Kit 2 x 3 U - 84 HP

For partitioning a 6 U subrack in 2x3U.

Delivery:

1 double front profile
2xVE1 - 85HP colorless chromated 1 double rear profile
2xHK - 85HP anodized
Mounting parts

order no.: **409. 166 270**

Subrack Accessories

Horizontal Mounting Frame

20 HP for horizontal mounting of 6U PCB's in 3U subracks.

The horizontal mounting frame needs 52 HP in the width.

For 84 HP subracks are available

Placed right:

52 HP for horizontal mounting frame,
32 HP for 3 U-PCB's

Placed left:

52 HP for horizontal mounting frame,
1 HP for air and leakage paths,
31 HP for 3 U-PCB's.

Labelling Rail, Locking Rail Label Strip

for subrack **FLEXIBLE Fs, RFI-SHIELDED, InterRail**

Labelling Rail 84 HP

This hinged labelling rail is mounted on the subrack flanges. Normally, it is placed in front of the front panels. For ejecting a PCB, the rail is turned down.

order no.: **409. 121 941**

Delivery:

1 labelling rail
2 mounting flanges
2 hinge brackets
Mounting parts

Locking Rail 84 HP

For locking of PCB's without front panels.

The locking rail is mounted at the horizontal rail in front of the PCB's. A labeling strip can be insert into a groove.

order no.: **409. 120 790**

Delivery:

1 locking rail
1 rubber
Mounting parts

Label Strip

Self adhesive. For identifying PCB slots in the subrack. The PCB slot number can be read through the hole in the front panel.

Note:

The label strip cannot be read while using the RFI spring P2.

Material: PC/PE-foil

Color: yellow/black

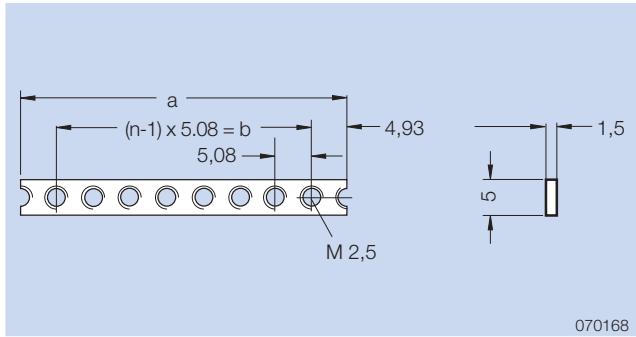

Delivery

Minimum purchase: 18 pieces on a papersheet.

Card Guide with integrated push and pull assist

Card Guide with integrated push and pull assist

This special card guide with an integral small lever aids in the handling of PCB's with high pin plug in connectors.

The lever is supported by the walls of a special guide chamber when the board is pulled out or pushed in. It is suitable for a spring to contact a track near the PCB edge.

This card guides are snap-in and can be secured with screws.

Delivery:

- 1 card guide top
- 1 card guide bottom

Technical data

| | |
|------------------------|--|
| Material | card guide: PBT lever: PPO grooved pin: steel, blank |
| Color | black |
| Continuous temperature | - 40 °C up to + 130 °C |
| Fire protection class | UL 94 V-0 |

**Card Guide CONN**

For easy screwless snap-on mounting of connectors accordance to IEC 60603/DIN 41 612.

With a provision for a spring to contact front panels and for contacting a track near the PCB edge.

This snap-in card guides can also be secured with screws.

Delivery:

1 card guide CONN top

1 card guide CONN bottom

Card Guide VIB

Card Guide VIB

Lattice construction for heavy mechanical loads.

With a provision for a spring to contact front panels and for contacting a track near the PCB edge.

This card guides can be snapped in and/or secured with screws.

Two versions:

1. With pressed-in nut M 2.5 for assembly to the horizontal rail with oval head screws M 2.5 x 12
2. Without a nut, but one can be added in the existing hexagonal molding.

Card Guide IEEE and Card Guide IEEE with 1/2 HP lateral offset

Technical data

| | |
|------------------------|----------------------|
| Material | PBT |
| Color | black or red |
| Continuous temperature | -40 °C up to +115 °C |
| Fire protection class | UL 94 V-0 |

Card Guide IEEE

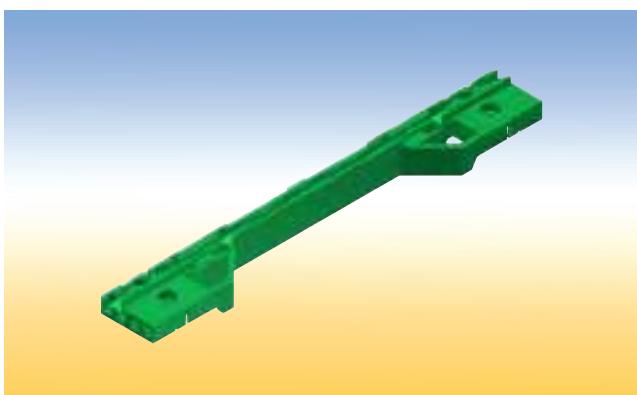

This card guide is in accordance to specification IEEE 1101.10.

The required coding of the IEEE is integrated in the card guide head.

With provision for the IEEE contact spring for grounding of the alignment-pins of the PCB's front panel. Also with a provision for contacting a track near the PCB edge. This snap-in card guides can be secured with screws.

Ordering details for card guide IEEE

| | | | 116 440 |

Card Guide IEEE with 1/2 HP lateral offset

This card guide is also in accordance to specification IEEE 1101.10.

For CompactPCI-power supplies and for Plug-in units fitted with SMD.

With provision for the IEEE contact spring for grounding of the alignment-pins of the PCB's front panel. Also with a provision for contacting a track near the PCB edge.

This card guide is secured with screws.

Technical data

for card guide UNIVERSAL, CONN, VIB and VARIO

Coding Head IEEE

Snapped on the head of standard card guides to comply to the requirements of the specification IEEE 1101.10

Functions:

1. Holding the IEEE contact spring for grounding the alignment pins of the front panel.
2. Adapting the IEEE coding pin.
3. Guiding the 1.6 to 2.4 mm thick PCB.

Technical data

| | |

Front Panels

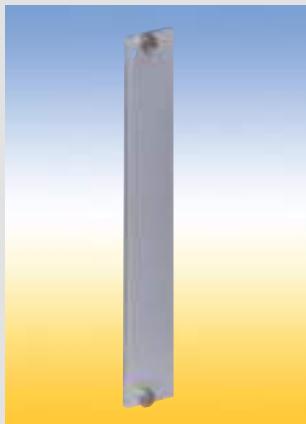

In addition to the wide range of standard front panels we also provide on request individual customer specific front panels with punching, surface finish and silk screening.

Textured or smooth painted in all relevant RAL-colors, abrasion-resistant silk-screen printing as well as color coordinated engraving give your front panel an individual appearance.

Please ask your local representative for your
individual front panel design.
You find your contact person on our homepage:
www.intermas-el.com

✓ Plastic Front Panels

Blind Front Panels

Blind Front Panels

For covering empty sections or to carry various components in subracks.

Four versions are available:

1. Flat front panel blank

The front side is covered with a removable transparent foil.

2. Flat front panel anodized

Front anodized, rear conductive.

3. Flat front panel RFI

Front anodized, rear conductive, with slits in the side edges for insertion of RFI springs.

4. Extruded front panel RFI

Made of extruded aluminum alloy, with slits in the side edges for insertion of RFI springs for contact.

Surface finish is passivated.

Material

Flat front panel: aluminum 2.5 mm thick

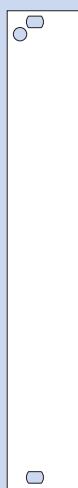

Extruded front panel: aluminum

Delivery

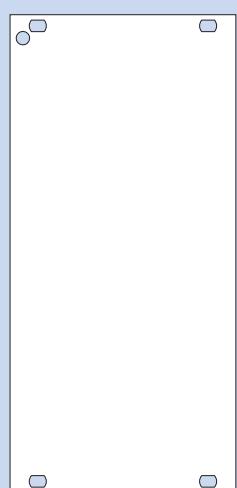

Front panels are delivered unassembled as single parts or as a kit.

|------------------------|-------------------|
| | order no. 409. |
| Pr rail VE12SFP-RFI-85 | 114 562 |
| Flange RFI - FP - 3 U | 114 708 |
| Flange RFI - FP - 6 U | 114 715 |
| RFI spring F3 - 3U | 111 112 |
| RFI spring F3 - 6U | 111 116 |

For one front panel 2 RFI springs are needed.

Plug-in Front Panel 85 HP

The front panel bottom edge is inserted in the groove of a specially profiled rail. With slits in the side edges for insertion of RFI springs.

To be used in combination with below mentioned flanges only.

Finish:

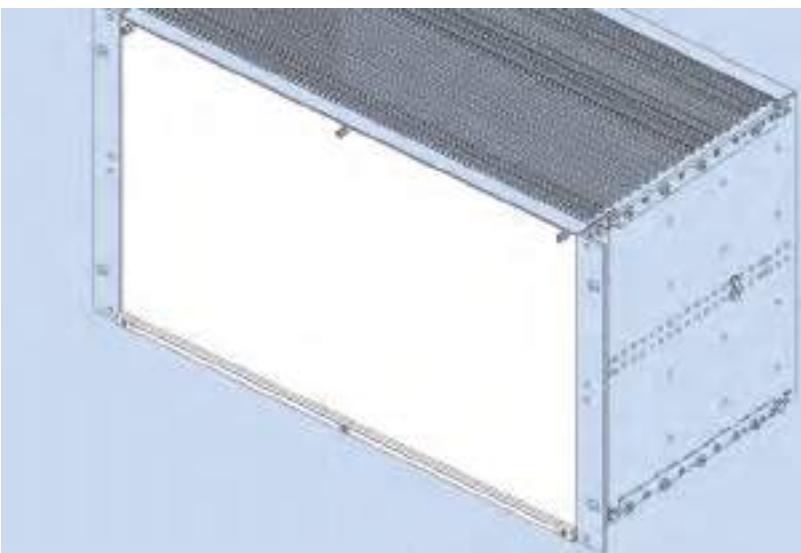

front side anodized, rear side conductive

Delivery:

1 front panel
3 grounding bushing M 2.5
3 cross-head screw M 2.5 x 11.3

For one front panel 2 RFI springs are needed.

Hinged Front Panel 85 HP

With slits in the side edges for insertion of RFI springs. The hinge is screwed to the prprofiled rail of the subrack. An 84 HP threaded strip is needed.

To be used in combination with below mentioned flanges only.

Finish:

front side anodized, rear side conductive

Delivery:

1 front panel
1 hinge
3 grounding bushings
Mounting parts

Delivery: as unassembled kit.

Assembled kits on request.

Front Panels with Handle

Front Panels with Handle

For assembly on a PCB.

Handle and front connector are screwed on the front panel.

The plain front panel is easy to modify.

Four versions are available:

1. Flat front panel blank

The front side is covered with a removable transparent foil.

2. Flat front panel anodized

Front anodized, rear conductive.

3. Flat front panel RFI

Front anodized, rear conductive.

With slits in the side edges for insertion of RFI springs.

4. Extruded front panel RFI

Made of extruded aluminum alloy, with slits in the side edges for insertion of RFI springs for contact.

Surface finish is passivated.

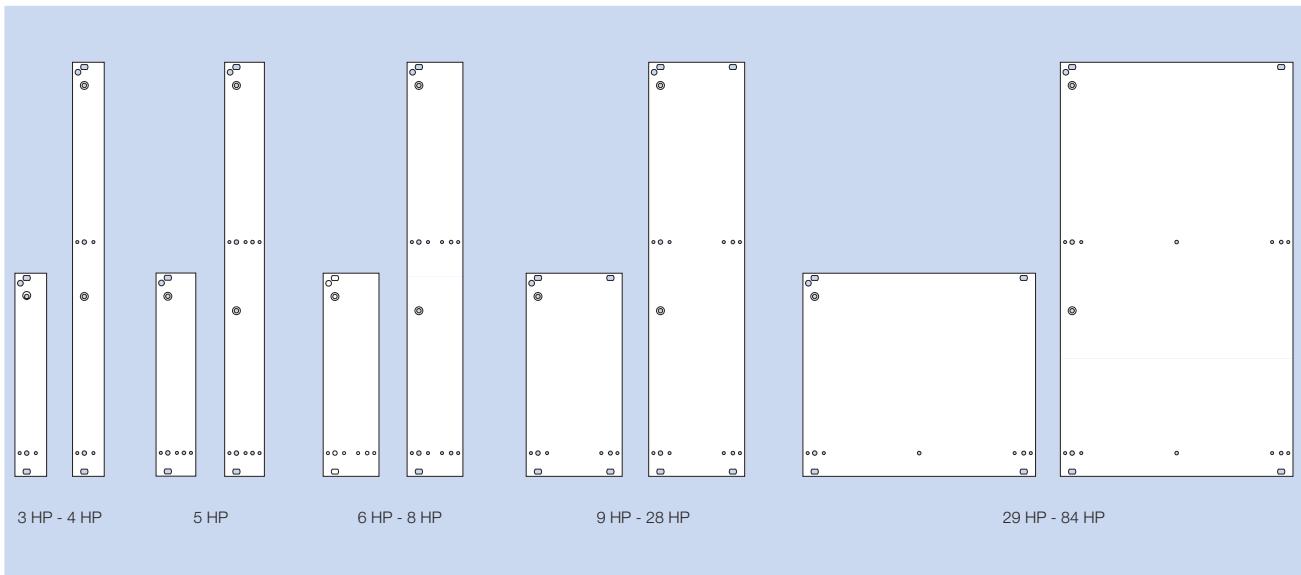

Material

Flat front panel: aluminum 2.5 mm thick

Extruded front panel: aluminum

Delivery

Front panels are delivered unassembled as single parts or as a kit.

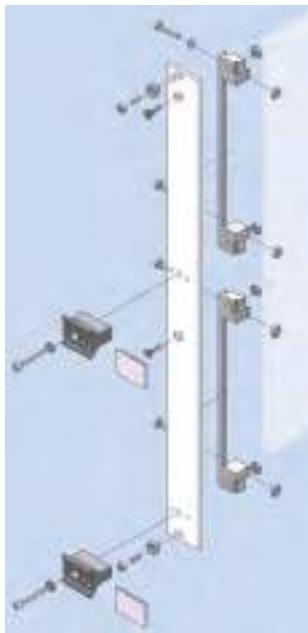

Hole pattern of the front panels

Front Panels with Ejector Handle

Subrack Accessories

Front Panels with Ejector Handle

For easy release of PCB's with high pin connections. The ejector handle is extends through the front panel and is screwed together with the bearing bushing at the front connector.

Four versions are available:

1. Flat front panel blank.

The front side is covered with a removable transparent foil.

2. Flat front panel anodized.

Front anodized, rear conductive.

3. Flat front panel RFI

Front anodized, rear conductive. With slits in the side edges for insertion of RFI springs.

4. Extruded front panel RFI

Made of extruded aluminum alloy, with slits in the side edges for insertion of RFI springs for contact. Surface finish is passivated.

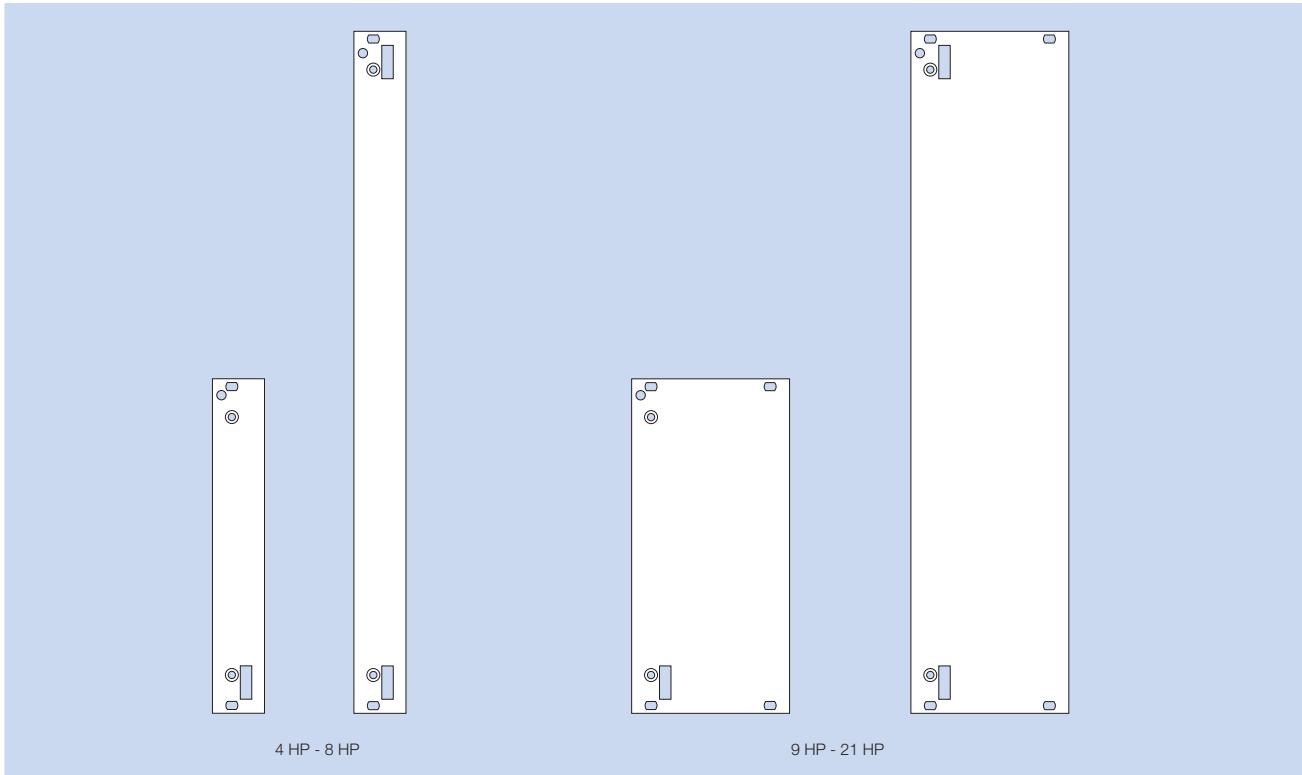

Material

Flat front panel: aluminum 2.5 mm thick

Extruded front panel: aluminum

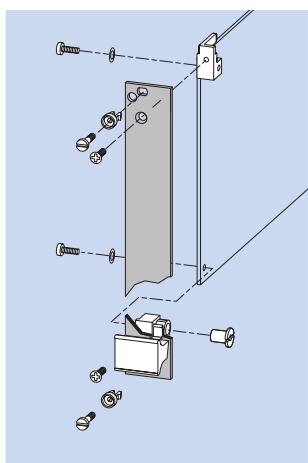

Delivery

Front panels are delivered unassembled as single parts or as a kit.

Front Panels RFI with IEEE Handle

Technical data

| | |
|------------------------|--|
| Material | Front panel: aluminum Handle: Polycarbonate |
| Finish | Front panel: <i>flat</i> : front side anodized, rear side conductive <i>extruded</i> : passivated |
| Color | handle: RAL 7035 or black |
| Continuous temperature | - 40 °C to + 100 °C |
| Fire protection class | UL 94 V-0 |

Front Panels with IEEE Handle

For easy pull of PCB's with high density connectors in accordance to specification IEEE 1101.10.

The assembled handle kit is stuck in the milled space of the front panel and is secured with a clamped spring. Afterwards the PCB are screwed on the integrated front connector.

Two versions with IEEE handle are available:

1. Flat front panel RFI

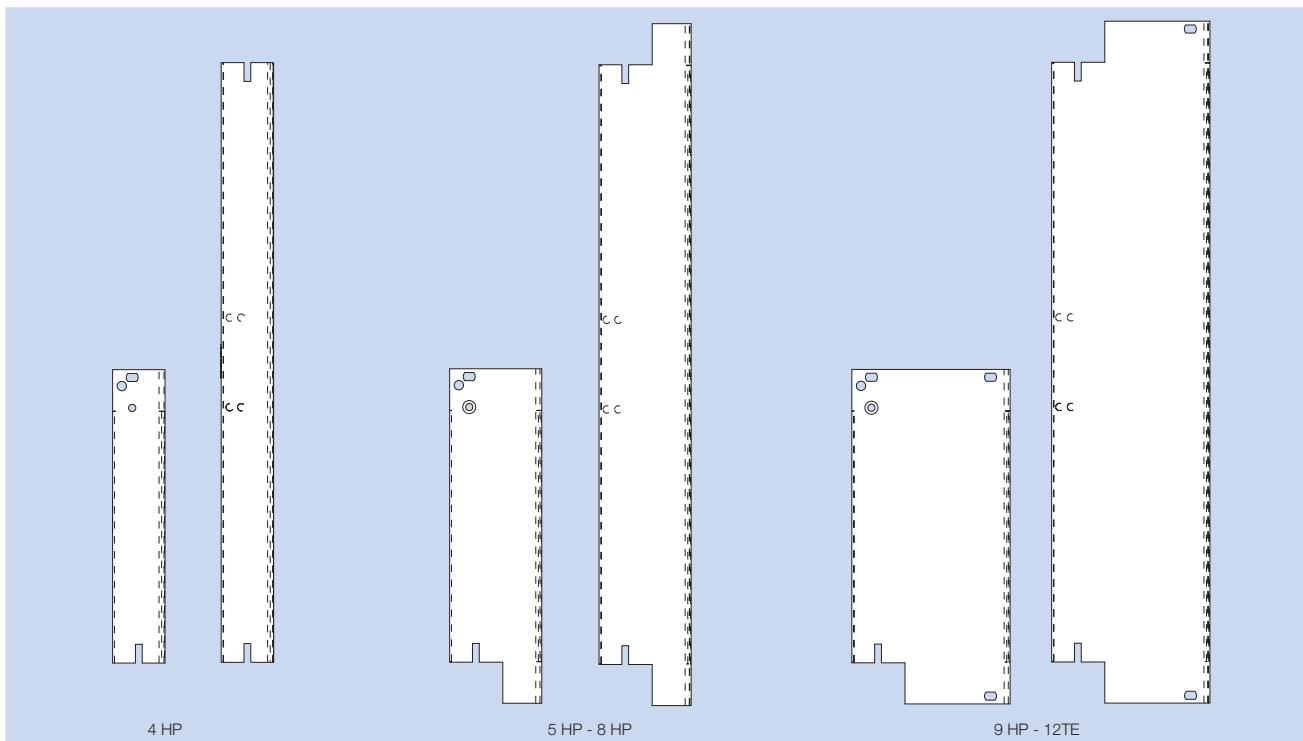

Front anodized, rear conductive. With slits in the side edges for insertion of RFI springs.

2. Extruded front panel RFI

Made of extruded aluminum alloy, with slits in the side edges for insertion of RFI springs or for contacting. Surface finish is passivated.

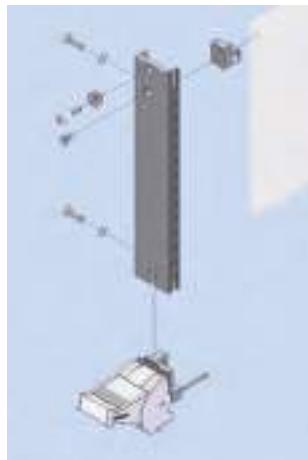

Delivery

Front panels are delivered with the assembled IEEE handle as single parts or as a kit.

Plastic Front Panel, Snap-in Handle

Plastic Front Panels

On the rear side of the 2 mm thick front panel is an integrated front connector for attaching 1.6 mm thickness 3 U PCBs.

The handle snappes in into the front panel, therefore the front panel can be modified easily.

Delivery

As single part

Cassettes

Cassette with Extruded Side Walls

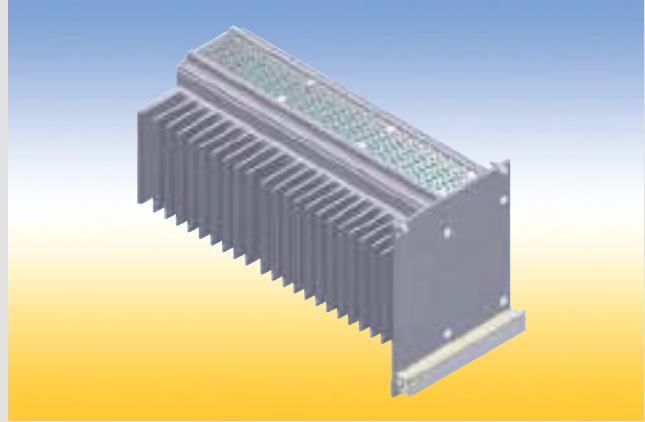

Cassette with four Depth Profiles

Cassette with Cover Hood

Cassette with Heat Sink

Cassettes

Description

The cassette has two functions:

It can be inserted into a subrack just like a PCB and it can accommodate plug-in boards.

Three cassette versions are available:

1. A cassette with extruded side walls

Extruded side walls in combination with a front panel and a rear panel make up the basic cassette which is then fitted with top and bottom plates.

2. A cassette with four depth profiles

Four identical depth profiles in combination with a front panel and a rear panel make up the basic cassette which is then fitted with top and bottom plates.

Two side service apertures are created which make the interior of the cassette easily accessible for inspection purposes. These apertures can be closed off using slide-in panels.

3. Cassette with cover hood

This version consists of a extruded side wall at the left to which the protective cover with an integrated rear wall is attached. The rear has a 4 HP aperture for installing an IEC 60 603-2 type B, C, D or F connector.

The special design features of the cassettes:

- ✓ The side edges of the front panel are slit for insertion of RFI gaskets which harmonically blend into the front panel grid and which require no additional space.
- ✓ The cassettes fit into all IEC 60 297 subracks.

- ✓ The cassette is fitted in the subrack using PCB guide mounts. For the right side of the cassette the guide mount is installed rotated by 180°.

- ✓ Suitable for accommodating Euroboards (3U, 6U) in accordance with IEC 60 297.
- ✓ The side walls and depth profils have guide channels for insertion of 3U or 6U boards; only installation at the left is standardized.
- ✓ Additional guide mounts can be snapped into the top and bottom cover panels to accommodate internal boards.
- ✓ When used in a subrack the distance between the cassette and the PCB to the right of it is 2.47 mm.

Rear panel:

Three different rear panels are available:

1. Cassette „RG“ (rear panel closed):

This cassette is particularly suitable for any installation.

2. Cassette „RT“ (rear panel with partial aperture):

The rear panel has a 4HP aperture for installation of a connector.

3. Cassette „RV“ (rear panel with full aperture):

The rear panel has an aperture across its full width and is perforated for installation of connectors.

Dimensions

The cassette design is based on the following grid:

Horizontal pitch 5.08 mm

Height pitch 44.45 mm

Depth pitch 10.00 mm

Technical data

| | |
|-------------------------|--|
| Standards | IEC 60297, Part 3 |
| Material | „RV“ rear panel, top and bottom panels: sheet steel mounting parts: steel handles: plastic other parts: aluminum |
| Finish | side panel, covers, „RV“ rear panel: untreated front panel: front anodized, rear and edges untreated other parts: passivated |
| Protection class | IP 30 |
| Utilization category | -25 °C to 70 °C, =< 75 % relative humidity, condensation possible |
| Electrical requirements | all parts are electrically bonded to one another following assembly in accordance with VDE 100 § 8 Nb. |

RFI shielding of Cassettes.

The Cassettes are manufactured from electrically conductive materials and screwed together.

The RFI shielding can be further enhanced by increasing the number of screws used in vulnerable areas to obtain a superior RFI seal:

1. Top and bottom plates / front panels

Additional mounting blocks can be used between the top and bottom covers and the front plate.

The top and bottom covers are pierced every 5.08 mm and by drilling extra holes in the front plane, additional contact points can be made.

2. Top and bottom plates / rear panels

Additional mounting blocks can be used between the top and bottom plates and the rear panels.

The top and bottom plates are pierced every 5.08 mm

and by drilling extra holes in the rear panel types "R" and "RT", additional contact points can be made. Rear panel type "RV" are pre-punched at 5.08 mm as standard and require no further modification.

3. 6 U Side wall / front panel

Two additional screws can be used in the front panel (one each side) to gain extra contact points to the side extrusion. Both the front panel and the extrusion require additional drilling.

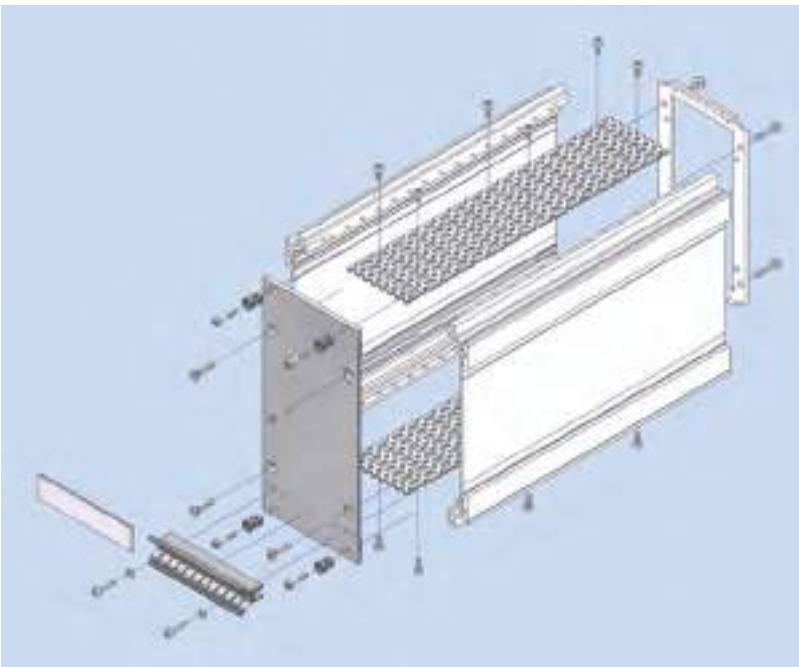

Intermas Cassettes have excellent RFI Shielding properties as standard.

But should you wish to enhance the RFI shielding, then please contact one of our specialists for further assistance.

Please ask your local representative for your
personal assistance.

You find your contact person on our homepage:
www.intermas-el.com

Cassette with Extruded Side Walls

Cassette with Extruded Side Walls

The cassette kits includes following rear panels:

1. Rear panel closed (RG)
2. Rear panel with partical aperture (RT)
3. Rear panel with full aperture (RV).

Kit consists of:

- 2 extruded side walls
- 1 rear panel
- 2 top/bottom plate
- 1 front panel, with slits in the side edges for insertion of RFI gaskets
- 1 handle
- 1 aluminum ident-plate
- Mounting parts

Delivery

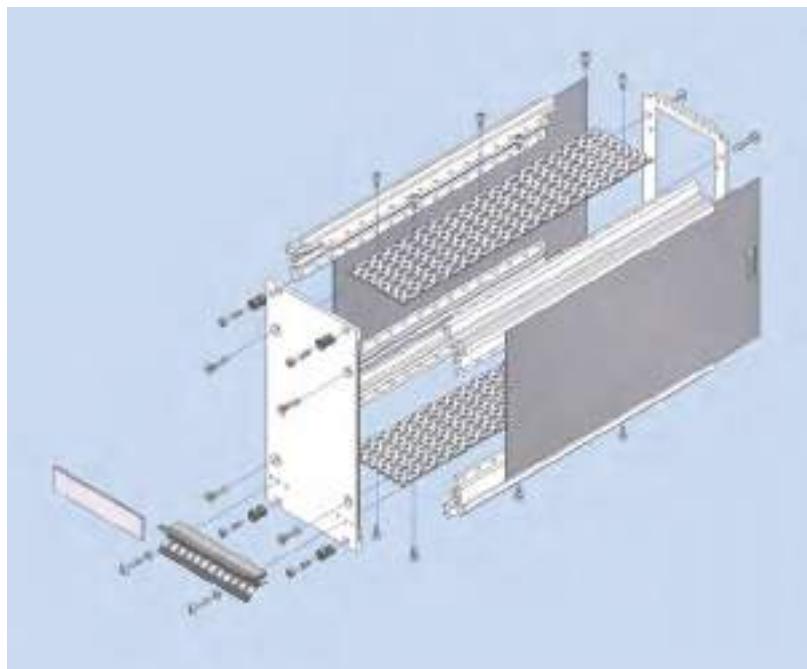

The cassette is delivered unassembled as individual parts or as a kit.

Accessories for Cassettes

Mounting Block

To connect top/bottom plate with rear panel.

The mounting block can also be used to enhance RFI shielding in conjunction with blank rear panel RG. The rear panel can be additionally drilled for extra contact points.

order no.: **409. 044 090**

Backplane Holder

To assemble backplanes on top/bottom plate.

order no.: **409. 119 013**

Accessories

Minimum order quantity each 100 pieces

order no.
409.

To assemble the rear plate and the backplane holder at the top/bottom plates

Oval head screw M 2.5 x 6 **046 999**

To assemble the backplane or the rear panel at the mounting block or backplane holder

Oval head screw Taptite M 2.5 x 10 **040 401**

Spring washer 2.7 **013 911**

Cassette Angle

To assembly a free wiring level inside of the cassette.
Mounted on the top/bottom plate.

Material: steel

Finish: galvanized and passivated

Ordering details cassette angle

Cassette with Heat Sink

This cassette is designed for passive cooling of electronic sub assemblies and systems. The thermal power loss which is generated in the 19“ cassette is dissipated by a heat sink which also serves as sidewall. The heat sink is covered by an asymmetric front panel. Euroboards are being fitted into card guides which can be snapped in every possible position in the cassette. A wide range of accessories, for example rear cover, handle and handle strip in different colors and types are available. The front panel can be fitted with RFI springs to realize RFI shielding of the front of the subrack. Optionally the complete cassette can be RFI shielded.

Delivery

4 depth profiles
1 side plates
1 heat sink, aluminum blank
1 rear panel 3 U
2 top/bottom plate
1 front panel, with slits in the side edges for insertion of RFI gaskets
1 handle
1 aluminum ident-plate
Mounting parts

Delivery

The cassette is delivered unassembled as individual parts or as a kit.

Customer specific electronic systems

- ✓ Electronic products according to your requirements
- ✓ Consulting service and development for mechanics, electronics and wiring
- ✓ Professional electronic integration and wiring
- ✓ Certifications (CE, UL, shock, vibration, etc.) on request

Customer specific electronic systems

System consulting

- ✓ Project planning combining your specifications and our know-how

Development

- ✓ Mechanics, customer specific electronics, prototype construction
- ✓ Consider environmental conditions like shock, vibration, temperature and RF-signals

Production

Metal processing, surface refinement, assembly

Electronics and wiring

- ✓ ESD compliant electronic assembly and wiring

Quality assurance

- ✓ Electrical safety tests, component test, system test, Burn-In

Control system with touch operation

- 2,5 U height and only 6 cm depth
- High performance in a small housing
- Development of a cooling concept
- Reliable touch operation

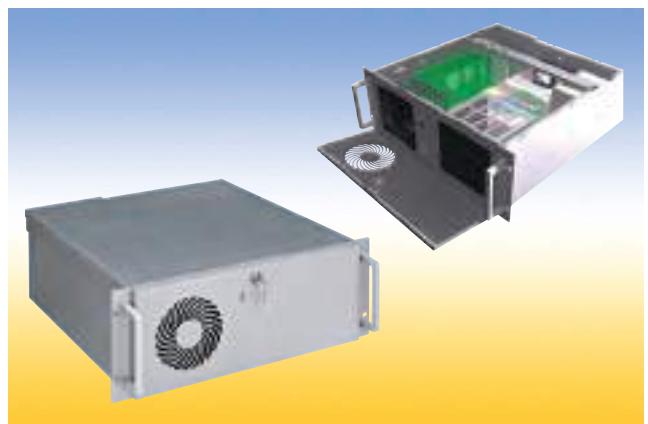

Application examples

High speed data acquisition system

- Customer specific design with PCI slots at front side
- High EMI requirements because of high frequency clocking
- Optimized cooling for high-quality components

Highly available Industrial PC

- Lockable front door to prevent unauthorized access
- System with shock and vibration dampers
- High reliability by using RAID and redundant power supply

Please ask your local representative for your
individual system configuration.
You find your contact person on our homepage:
www.intermas-el.com

MONOVOLT AC/DC-converters

30 to 120 Watt switched mode AC/DC plug-in power supplies with one output in 3 U Eurocassettes for use in 19" subracks to IEC 60297-3.

- ✓ Compact rugged design in stable aluminum cassette
- ✓ High regulation accuracy
- ✓ Remote On/Off and Powerfail signal
- ✓ SENSE-operation and Overvoltage protection (OVP)
- ✓ PK 60-R for redundant operation
- ✓ Convection cooling
- ✓ CE marked for compliance to EMC and Low Voltage Directives
- ✓ Safety according to EN 60950, UL, cUL
- ✓ VERO standardised pinning
- ✓ 24 months warranty

PK-Series BIVOLT AC/DC-converters

30 to 60 Watt switched mode AC/DC plug-in power supplies with two outputs in 3 U/8 HP Eurocassettes for use in 19" subracks to IEC 60297-3.

- ✓ High regulation accuracy
- ✓ All voltages individually adjustable
- ✓ Compact rugged design in stable aluminum cassette
- ✓ EN 60950, UL, and cUL approvals
- ✓ CE marked for compliance to EMC and Low Voltage Directives
- ✓ Overvoltage protection (OVP)
- ✓ No-load and short circuit proof
- ✓ Coded H15 connector
- ✓ VERO standardised pinning
- ✓ 24 months warranty

Power Supplies VP-Series, 40 and 50 1 - 3 Outputs

VERO power

AC/DC-converter

40 or 50 Watt switched mode AC/DC plug-in power supplies in 3 U/4 HP Eurocassettes for use in 19" subracks to IEC 60297-3.

- ✓ Wide input range 94-253VAC
- ✓ High efficiency from 75% to 84%
- ✓ CE marking according EMI and LV directive
- ✓ Safety according to EN 60950, UL, cUL
- ✓ Optional: EMI front panel, no front panel
- ✓ VERO standard pinning, suits to PK 60
- ✓ SENSE-operation
- ✓ Convection cooling
- ✓ 24 months warranty

With modern switch mode technology VP 40 achieves

Power Supplies VP-Series, 80 and 150 1 - 3 Outputs

VERO/power

With the new VP 80 / 150 series and efficiency from 83% up to 87% is achieved while power density is increased over its predecessors by more than 30%. Without the need for external heatsinking, the 80 W or 150 W out-put power can be achieved with natural convection cooling. A wide range of multi O/P units is

AC/DC-converter with PFC

80 or 150 Watt switched mode AC/DC plug-in power supplies in 3 U/8 HP respectively 12 HP Eurocassettes for use in 19" subracks to IEC 60297-3.

- ✓ Active Powerfactor Correction PFC
- ✓ Wide input range 94-253VAC
- ✓ High efficiency from 83% up to 87%
- ✓ Power share between outputs
- ✓ N+1 redundant types on request
- ✓ CE marking acc. EMI and LV directive
- ✓ Safety according to EN 60950, UL, cUL
- ✓ VERO standard pinning, VP 80 suits to PK 60 and VP 150 suits to PK 120
- ✓ 24 months warranty

further extended through power share technology, allowing maximum flexibility in the way power is delivered across the voltage rails, for smaller and more economical solutions. The range is enhanced with „Type R“ versions, designed for N+1 redundant applications or battery back-up systems.

MONOVOLT AC/DC-converter

50 Watt switched mode AC/DC plug-in power supplies with one output in 3 U/8 HP steelcassettes for use in 19" subracks to IEC 60297-3.

- ✓ Reduced cost power supply on 100 x 160 mm Eurocard
- ✓ Steel cover
- ✓ Wide input range
- ✓ Overvoltage protection (OVP)
- ✓ No load and short circuit proof
- ✓ Powerfail signal
- ✓ Coded H15 connector
- ✓ VERO standardised pinning
- ✓ Separate frontpanel kit with handle
- ✓ 24 months warranty

TRIVOLT DC/DC-converter

60 to 120 Watt switched mode DC/DC plug-in converter with three outputs in 3 U Eurocassettes for use in 19" subracks IEC 60297-3.

- ✓ Compact rugged design in stable aluminum cassette
- ✓ DC input range 2:1 ratio
- ✓ High regulation accuracy
- ✓ Separate adjust of all outputs
- ✓ SENSE-operation and Overvoltage protection (OVP)
- ✓ Convection cooling
- ✓ CE marked for compliance to EMC and Low Voltage Directives
- ✓ VERO standardised pinning
- ✓ 24 months warranty

Wiring and Accessories

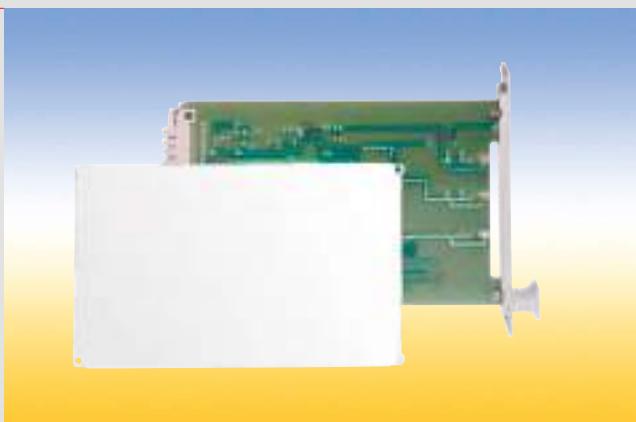

Connectors and Accessories

- ✓ In accordance with IEC 60 603-2 / DIN 41 612
- ✓ Designs supplementing the standards

Cover for Euroboards

- ✓ Self-extinguishing in accordance with UL 94-V0
- ✓ For use with or without a coding strip

Interface Housings for IEC 60 603-2 / DIN 41 612 Connectors

- ✓ Plastic version
- ✓ Metal version
- ✓ Shielding concept
- ✓ Also for railway applications in accordance with BN 74 016

SE Bus Bars

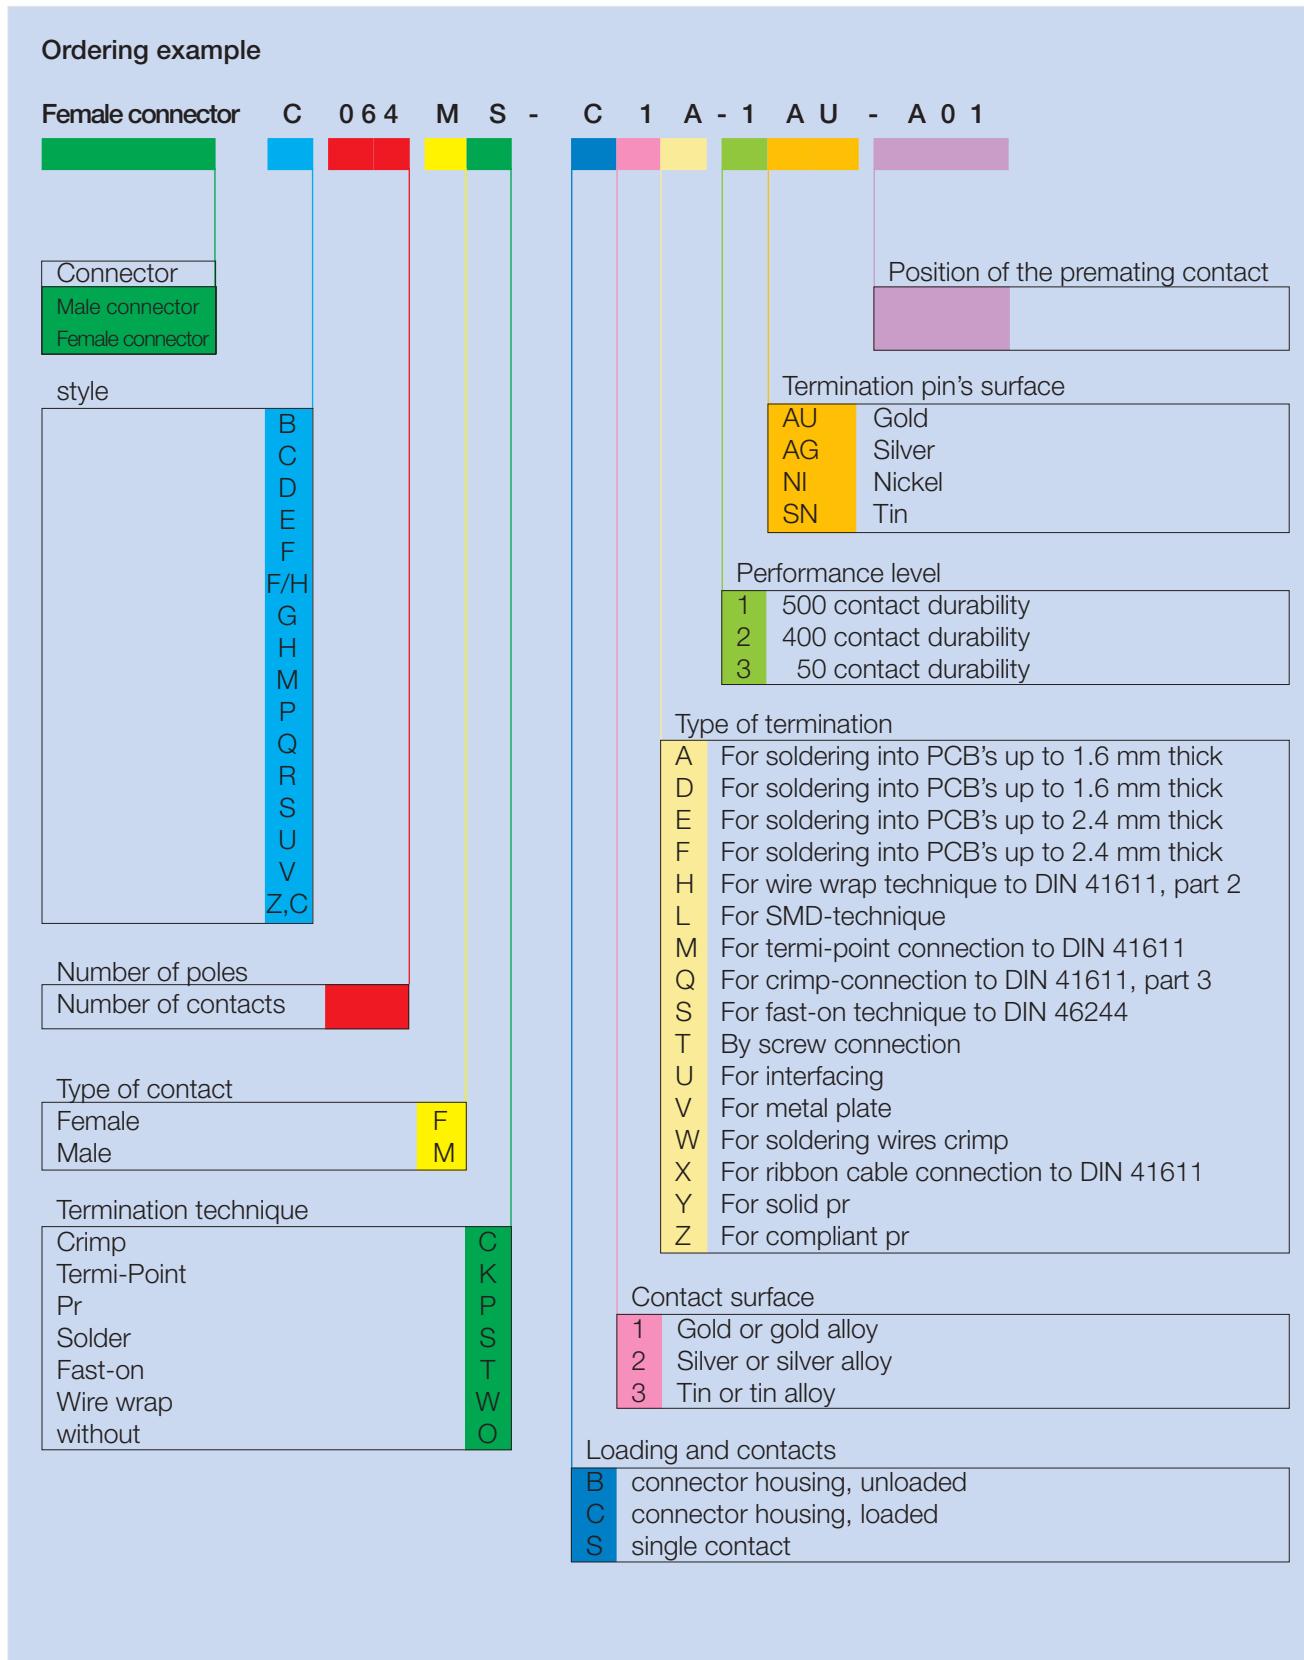

- ✓ High current capacity up to 120 A
- ✓ Two connection types
- ✓ 2 or 3-pole

Connectors

Coding key for IEC 60 603-2 / DIN 41 612 connectors

Since this catalog not only contains DIN 41612 connectors but also connectors which supplement the standard, the coding key has been extended accordingly.

Mounting of Connectors

Connectors in accordance to DIN 41612 can be mounted with commercial DIN screws.

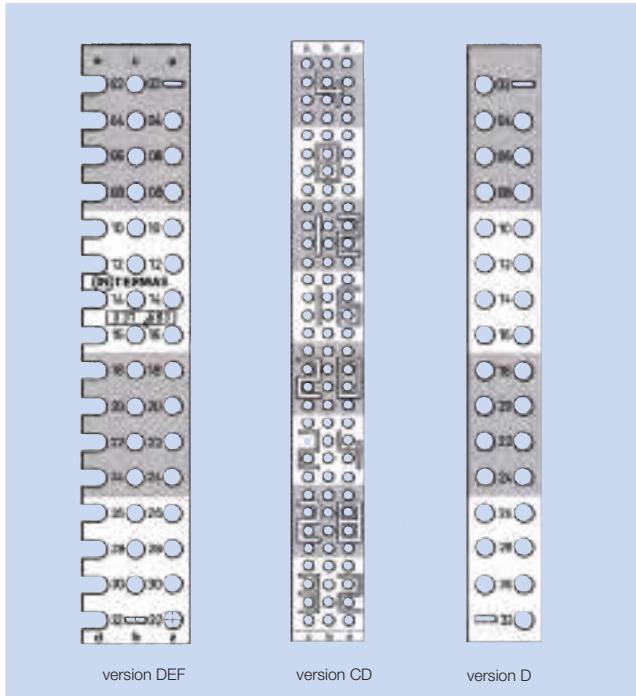

Using tapered screw, the connectors can be mounted in correct position without any adjustment or alignment.

Ordering details

Minimum order quantity each 100 pieces

Accessories for Connectors

Marking Strips

IEC 60603-2 / DIN 41612 provides labeling for connectors on their wiring side.

Marking strips, made of thin plastic foil (Astralon), ensure the perfect designation of pin positions.

1. Type DEF

for connectors styles D, E and F with pin cross section 1,0 x 1,0 and 0.8 x 1.6 and 0.8 x 2.4 mm and for connectors with the type of termination V.

2. Type CD

for connectors styles C and D with pin cross section 0.6 x 0.6 u.1,0 x 1,0 mm and for connectors with the type of termination V.

for connectors style D

order no.: **409. 044 214**

Coding strip M, mounted together with the male connector

Coding strip F, mounted together with the female connector

Coding Strips

The coding strip is designed for attachment to connectors in accordance with IEC 60603-2 / DIN 41612 and is to be mounted together with the connector to the PCB. Also the mating coding part is mounted together with the connector to the wiring support. Each coding strip has 16 coding teeth, that can be broken off as necessary

Ordering details

| Coding strip F-plate ^{1) 2)} | 070 617 |
| Coding strip F-plate 2 ^{1) 3)} | 064 740 |

1) one functional unit comprises 1 coding strip M and one coding strip F

2) for attaching with self tapping screws

3) attaching at through hole

Description

This PCB cover protect the soldered side against dirt and contact. Two versions are available:

A standard PCB cover and a PCB cover for use with a coding strip.

The coding strip PCB cover can be used in connection with a coding strip on the connector.

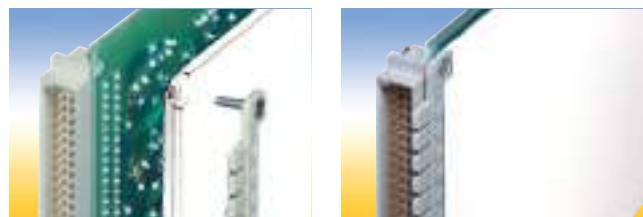

Mounting of PCB cover standard at the front panel

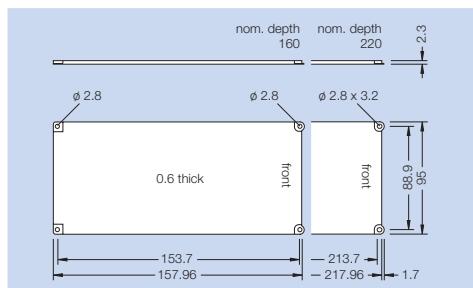

Mounting of PCB cover standard at side of the connector

Plastic Interface Housings

Description

This compact and insulating interface housing is designed to accommodate DIN 41 612 / IEC 60 603-2 connectors. It is physically clamped into position between guide elements. The interface housings have the following advantages:

- ✓ Accommodation of either female or male connectors of any type of connection technology.
- ✓ Protects the connector during insertion and operation.
- ✓ Lifting screws ease insertion and removal.
- ✓ Three cable feed apertures.
- ✓ Strain relief.
- ✓ Allows installation of display and operating elements.
- ✓ Codable.

Metallized plastic interface housing for RFI-shielding available.

Technical data

Metal Interface Housings

Description

The metal interface housing was developed on the basis of the plastic interface housing design as a totally metal housing with metal guide elements for heavy-duty use. It has the following advantages:

- ✓ Suitable for all 19" front panels in accordance with IEC 60 297-3 and IEEE fronts in accordance with P1101.10.
- ✓ For shielding between the interface housing and the front panel, in the E and F1 style RFI shielding panels can be added at the transfer side
- ✓ Coding already integrated or can be added, depending on the style
- ✓ Three cable feed apertures
- ✓ For cable diameters up to 17 mm
- ✓ For heavy-duty applications such as railway engineering, power station engineering etc.

Insulated Bus Bar

Description

Insulated bus bar kit for the power supply in housings and cabinets.

The features of the bus bars:

- ✓ High current capacity up to 120 A.
- ✓ Safe against accidental hand contact up to 500 V in accordance with VDE 0106.
- ✓ The protective profile makes the bus bar safe against accidental finger contact up to 220 V in accordance with VDE 0470.
- ✓ Deliverable in any desired length.
- ✓ With a width of 25 mm, 3-pole use is possible.
- ✓ Insulating materials in accordance with the stipulations of VDE 0606.

Two connection versions are available:

1. Connection version A:

Alternating terminal lugs for A 6.3 x 0.3 flat push-on connectors and screw attachment.

2. Connection version B:

Alternating terminal lugs for A 6.3 x 0.3 flat push-on connectors and double terminal lugs for A 2.8 x 0.8 flat push-on connectors or one A 6.3 x 0.8 flat push-on connector. Intermediate lengths can be produced by simply sawing.

Technical data

| | |
|------------------------|---|
| Number of poles | 2- or 3-pole |
| Connection version A | A 6.3 x 0.8 DIN 46244/connection Ø 4.2 mm |
| Connection version B | A 6.3 x 0.8 / 2 x A 2.8 x 0.8 DIN 46244 |
| Utilization category | -25 °C, +70°C, no condensation |
| Phase current | 120 A at an ambient temperature of 20 °C; 80 A at 55 °C; 70 A at 70 °C |
| Max. operating voltage | 500 V |
| Insulation class | group C in accordance with DIN/VDE 0110 |
| Test voltage | 3.1 kV |
| Amp capacity at 20°C | 25 A per pin connection A 6.3 x 0.8 |
| Material | bus bar: SE-Cu F37, hot-dip tinned insulating body: PP end cap: PC, black mounting parts: steel, galvanized, passivated |
| Fire protection class | insulating UL 94 V-0 |

Delivery

assembled

Kit consists of:

Rails
1 Plastic body
2 End caps
Mounting parts

Accessories

19" Fan Unit 1 U

For cooling of modules in cabinets or housings.

Delivery:

- 1 front panel
- 1 housing with grille
- 3 fans
- 1 power connector
- 1 strain-relief

Fan unit with 6 fans and other voltages on request.

19" Fan Unit 1 U with speed monitoring and control

For cooling of modules in cabinets or housings.

Delivery:

- 1 front panel
- 1 housing with grille
- 3 fans
- 1 connection cable, cable length 2.5 m, open end
- 1 temperature sensor external, NTC resistor, cable length 1.5 m

| Signal for | speed < 20 % of the nom. speed; switch-on delay < 4 s, signal delay < 1 s |
| Signaling | display via LEDs floating contact switching capacity 20 W switching voltage max. 100 V |

CoolSpot - 19" 1 U Fan Tray with infinitely variable Fan Modules

CoolSpot is a 19" 1U fan tray with the possibility to vary the number and position of fans according to the current heat load. It is designed for an economical but highly effective and precise cooling of electronic components within 19" cabinets and housings. Cooling air is directly supplied at the hot spots due to the infinitely variable positioning of the fans.

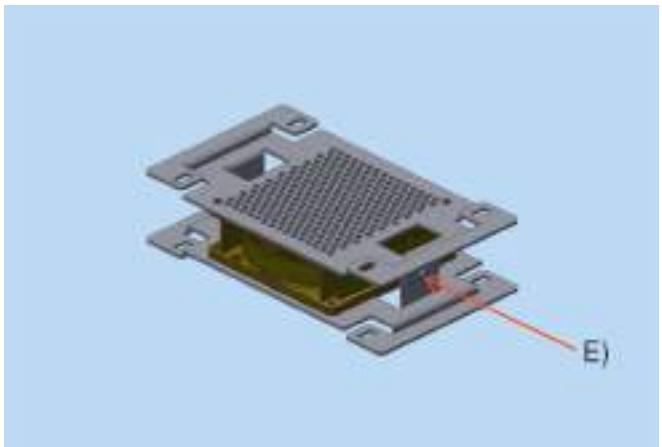

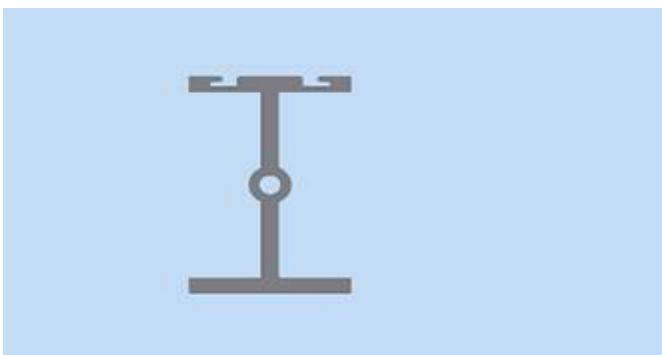

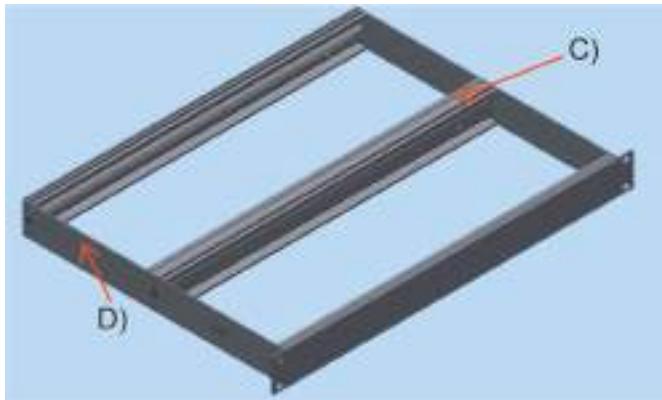

Specification CoolSpot basic frame

The CoolSpot fan tray is characterized by the following constructive features:

- ✓ The fan tray's basic frame consists of a front panel, two side stripes and an end profile.
- ✓ The side stripes are made of colorless pre-anodized aluminum. The cutting edges, which are a result of processing, are blank. Front panel and end profile are also colorlessly anodized.
- ✓ Front panel A as well as end profile B are manufactured from the same source profile in order to keep the construction as cost-effective as possible. The cutting edges are blank due to the necessary machining.
- ✓ There are two wings (pos. 1 & 2) on the profiles' inside to enable a linear guidance of the fan modules.
- ✓ The upper wing has a groove (pos. 3) to include retaining clips. These retaining clips secure the fan modules against unintended shifting.
- ✓ There is a screw channel in the centre (pos. 4) which enables the assembly of thread-forming screws to the side strips.
- ✓ Each side strip has four stamped nubs (pos. 5). These guarantee a sufficient protection against twisting during the basic frame's assembly, even though the entire basic frame is put together installation-friendly with only four screws.

CoolSpot - 19" 1 U Fan Tray with infinitely variable Fan Modules

Specification CoolSpot extension kit

An extension kit is available as the CoolSpot basic frame only allows an installation of a maximum of four fan modules in a single-row arrangement.

- ✓ The extension kit uses the already existing basic frame's front panel and end profile and adds an intermediate profile C.
- ✓ The basic frame's both side panels are replaced by longer side panels D.
- ✓ These reconstruction measures enable the installation of a maximum of eight fan modules in a two-row arrangement.

Specification CoolSpot fan module

- ✓ The CoolSpot fan module is characterized by its easy assembly.
- ✓ The fan module either consists of a fan in the standard measures of 92x92x25 mm and two mounting plates or of a fan in the standard measures of 120x120x32 mm and the corresponding mounting plates.
- ✓ Each of both mounting plates has two pins. These pins are used for positioning the fan and act as protection against twisting when assembling the fan module.
- ✓ Both mounting plates are connected with two thread-forming screws E. Thus the fan is clamped between both mounting plates. There is no additional screw connection necessary for the fan itself.
- ✓ Any desired fan up until a height of 32 mm can be inserted by exchanging the mounting plates.
- ✓ Every fan module's construction kit contains four retaining clips in order to secure the fan modules against unintended shifting within the fan tray.
- ✓ We use either SEPA oder EBM-Papst fans in our fan trays to satisfy all demands regarding long service life and cost-benefit ratio. Other fan types can be delivered on request.

CoolSpot - 19" 1 U Fan Tray with infinitely variable Fan Modules

Specification CoolSpot wiring kit

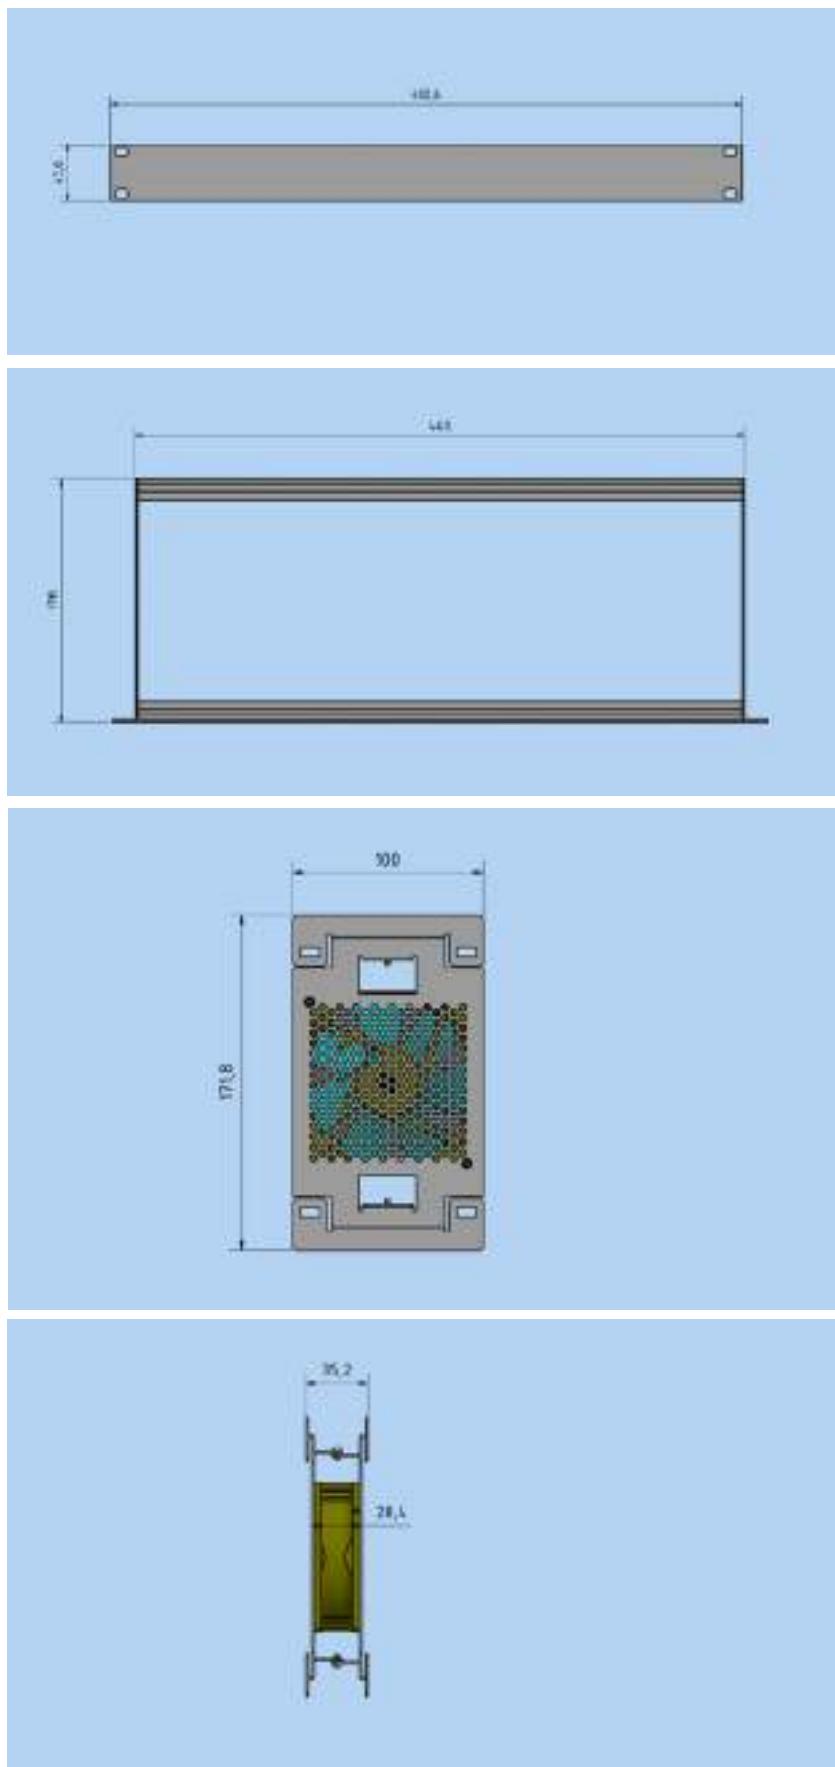

- ✓ By default the wiring kit contains a 2-pole Phoenix plug for the fan tray's power connector.
- ✓ Different connectors can be ordered optionally.
- ✓ Small parts such as cable holders, cable ties, cable glands etc. are also part of the wiring kit.

CoolSpot - 19" 1 U Fan Tray with infinitely variable Fan Modules

Configuration example

Step 1: Selection of required CoolSpot basic frame.

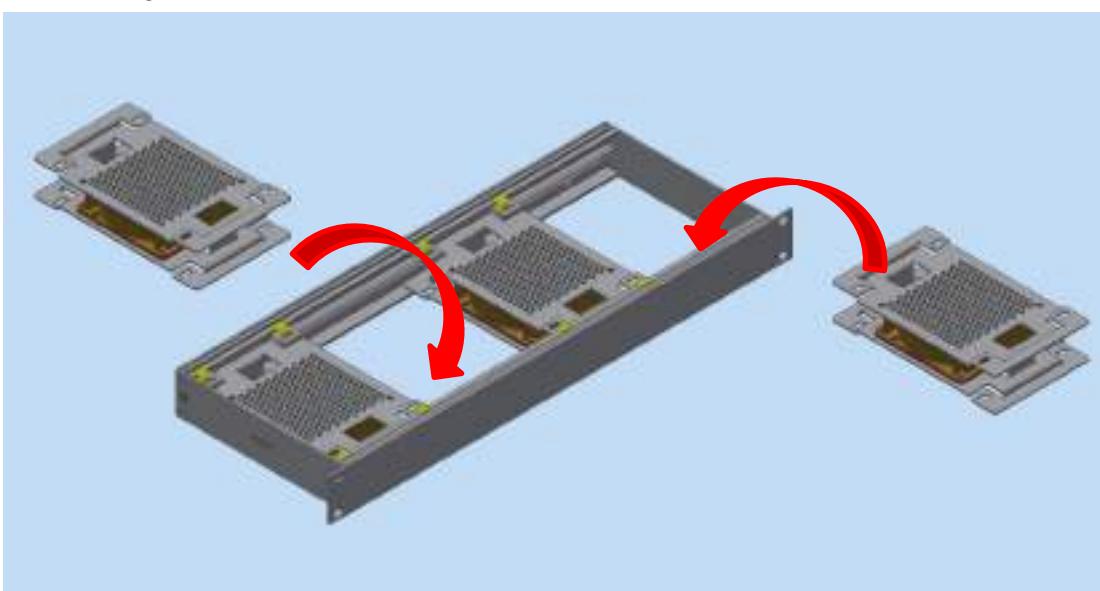

In this example: simple basic frame 409. 208 590 for a fan size of 92 mm.

Step 2: Selection of required CoolSpot fan module in desired quantity (maximum of 4).
In this example: fan module 409. 208 592 with SEPA fan in size 92 mm.

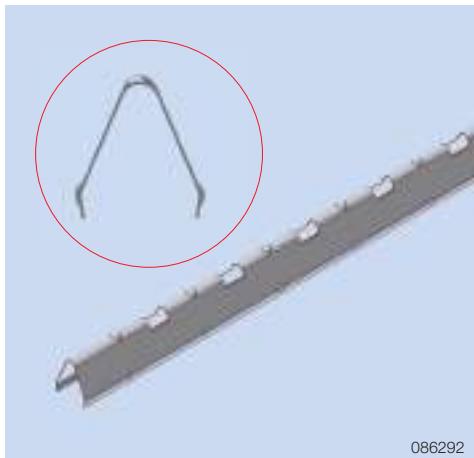

The configured fan of choice can also be delivered as an assembled version.

This catalog contains stock and standard parts. Other products and sizes on request.

RFI Spring A2 and F3

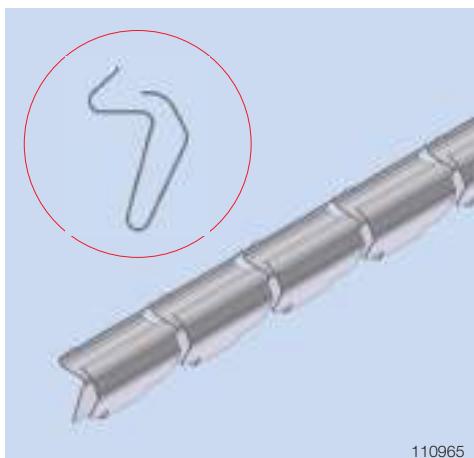

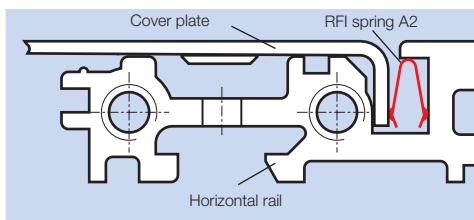

RFI Spring A2

Shielding between the cover plates and the subrack. The spring is snapped into the profile channel at the horizontal rail.
It can be cut in 10 mm lengths.

Material: stainless steel, 0.1 mm thick

Ordering details

| | nom. width [HP] | length [mm] | order no. |
|---------------|--------------------|----------------|-----------|
| RFI spring A2 | 36 | 182 | 107 724 |
| RFI spring A2 | 42 | 217 | 090 800 |
| RFI spring A2 | 84 | 427 | 085 011 |

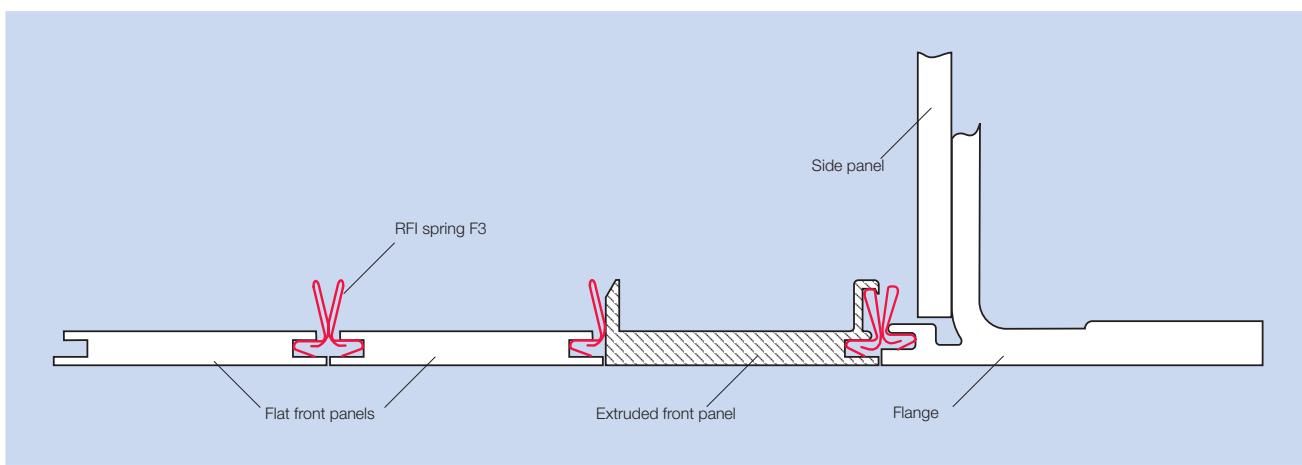

RFI Spring F3

Shielding between the front panels and between front panel and flange as well as shielding the cover plates of the DiVar housing.
It can be cut in 7.41 mm lengths.

Material: stainless steel, 0.08 mm thick

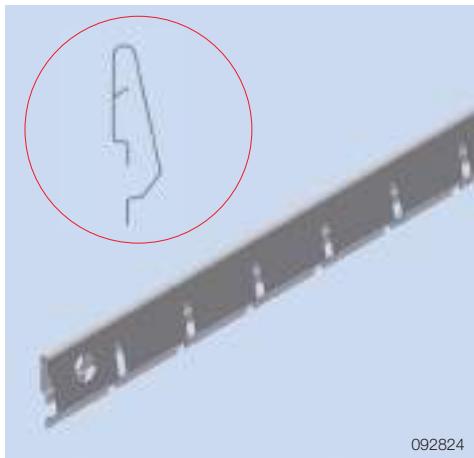

Ordering details

| | nom. height [U] | height [mm] | order no. |
|----------------------|--------------------|----------------|-----------|
| RFI spring F3-2 | 2 | 51.37 | 112 386 |
| RFI spring F3-3-IEEE | 3 | 95.83 | 111 112 |
| RFI spring F3-3 | 3 | 110.65 | 111 636 |
| RFI spring F3-4 | 4 | 155.11 | 112 387 |
| RFI spring F3-6-IEEE | 6 | 229.21 | 111 116 |
| RFI spring F3-6 | 6 | 244.03 | 111 637 |

Shielding between the front panel and between front panel and flange

RFI Spring F1, Contact Profile and RFI Spring P2

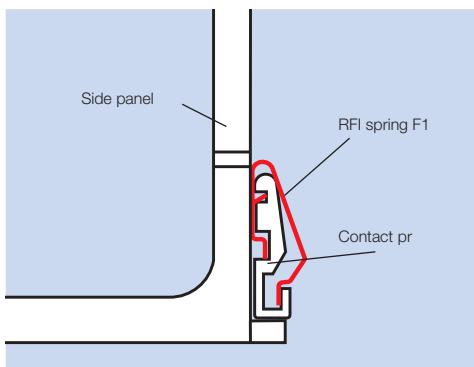

RFI Spring F1

Shielding between the front panel and side panel with the contact profile of the *InterRail* subrack.

Material: CuSn 0.1 mm thick

Ordering details

| | nom. height [U] | height [mm] | order no. |
|-----------------|--------------------|----------------|-----------|
| RFI spring F1-3 | 3 | 106.9 | 093 400 |
| RFI spring F1-6 | 6 | 240.25 | 093 401 |

Contact Pr

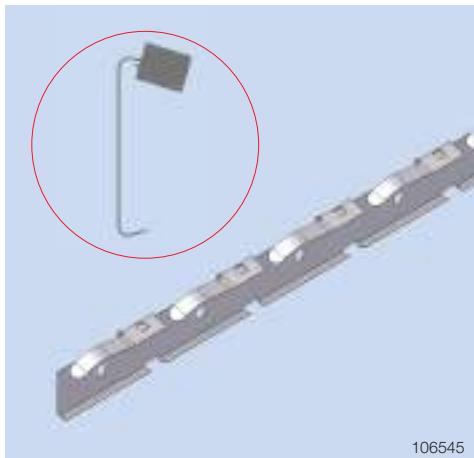

Shielding between front panel and side panel with the RFI spring F1 of the *InterRail* subrack.

Material: aluminum

Finish: passivated

Ordering details

| | nom. height [U] | height [mm] | order no. |
|---------------|--------------------|----------------|-----------|
| Contact pr -3 | 3 | 107.5 | 092 923 |
| Contact pr -6 | 6 | 240.85 | 092 924 |

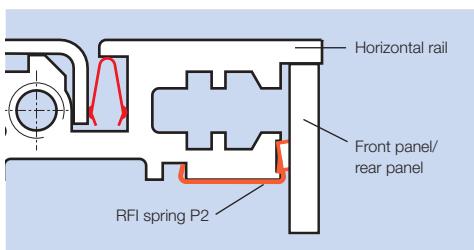

RFI Spring P2

Shielding front panels and rear panel to the horizontal rail.
The spring is snapped into the pr
It can be cut in 15.24 mm lengths.

Material: stainless steel, 0.08 mm thick

Ordering details

| | nom. width [HP] | length [mm] | order no. |
|---------------|--------------------|----------------|-----------|
| RFI spring P2 | 42 | 212.36 | 106 546 |
| RFI spring P2 | 84 | 425.72 | 106 547 |

RFI Spring U1 and U2

RFI Spring U1

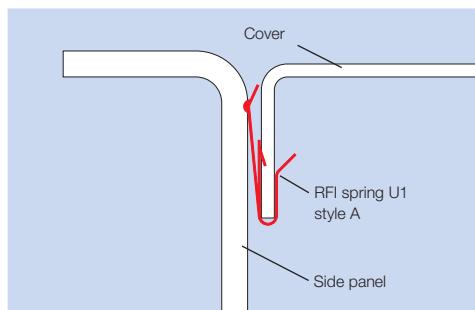

Multiple applications.
Shielding subracks,
housings and cabinets
with 1 mm - 2.5 mm
sheet thickness.
The spring can be cut in
10 mm lengths.

Material:

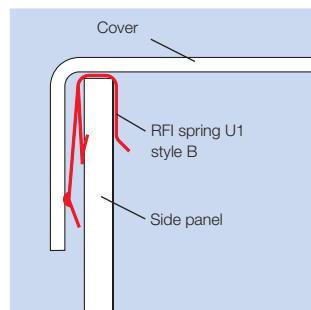

stainless steel, 0.1 mm
thick

Ordering details

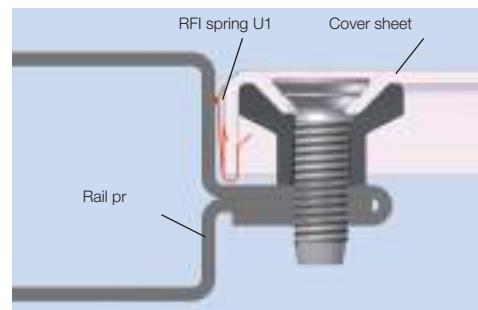

| | style | sheet thick- ness [mm] | length [mm] | order no. 409. |

RFI Spring M-P2, G-A2, G-P2 and RFI Fabric Gasket

106532

RFI Spring M-P2

Shielding between side panel and backplane with a mounting strip.
The spring can be cut in 25 mm lengths.

Material: stainless steel, 0.08 mm thick

Dimensions: 85 x 5 mm

Length: 424 mm

order no.: 409. 106 533

Accessories

Mounting strip

order no.: 409. 111 691

110284

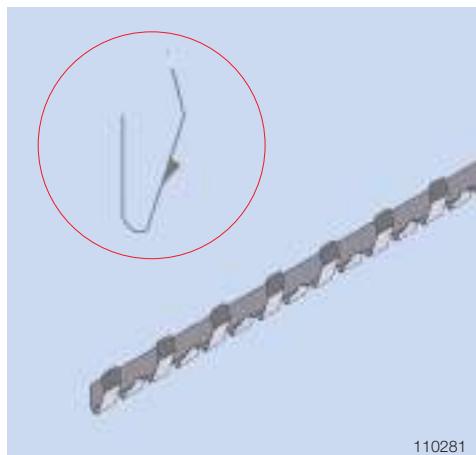

RFI Spring G-A2

Shielding between the profiles and the cover plates of the *InterMeZo* housing.
The spring can be cut in 25 mm lengths.

Material: stainless steel, 0.15 mm thick

Length: 469 mm

order no.: 409. 110 960

110281

RFI Spring G-P2

Shielding between the door/rear panel and the profile of the *InterMeZo* housing.
The spring can be cut in 14.815 mm lengths.

Material: stainless steel, 0.15 mm thick

Length: 471.83 mm

order no.: 409. 111 534

RFI Fabric Gasket, self-adhesive

Shielding between the door/rear panel and the profile of the housing.

Material: polyurethane foam core covered with copper-nickel (CuNi) metal fabric

Dimensions: height 9.5 x width 6.4 x length 1000 mm

Fire protection class: UL 94 V-0

order no.: 409. 175 397

This catalog contains stock and standard parts. Other products and sizes on request.
